MS-64 will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

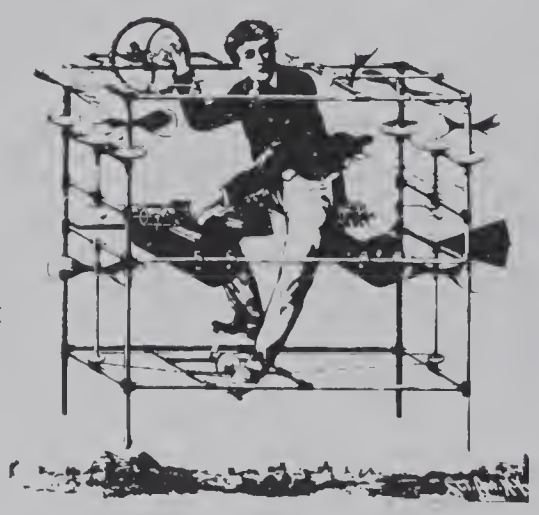
CAN WE TALK?

1. More Productive Staff

A company is only as good as its people. The principals of our company, Ronald and Dennis Gillio, are celebrating their 25th anniversary of serving the numismatic community. Staff members have been with us for up to 15 years. We believe in long term relationships.

4. Profits



You are invited to profit from our quarter century of experience . . . profit from our realistic prices and honest grading. And see your profits grow from happier retail/mail order customers.

2. Satisfied Customers

Our wholesale clientele knows that we are a direct source, buying in Europe and the Orient to assure very competitive prices for U.S. and World Gold coins, U.S. Silver Dollars, etc. Grading has always been taken seriously here; Ron Gillio has been acknowledged for special help in the Official ANA Grading Standards book.

5. Creative Flexibility

We offer "state-of-the-art" numismatics. We are the innovator of AUTHENTIGRADE Mint State sealed U.S. Gold Eagles and Double Eagles, and are a founding member of the Professional Coin Grading Service, making markets in all U.S. Gold denominations. Our up-to-the-minute buy/sell prices are available on Reuters and FACTS telecommunications systems. And we publish a weekly buy/sell price list for our regular clients.

3. Knowledge not Data

There are dozens of numismatic investment newsletters, many quite good. We offer more . . . 25 years of expertise "on the front lines". Call Ron or Dennis Gillio, and find out personally what is really happening in the coin market. No bull.

6. New Relationships

We are a "dealers' dealer" . . . known and respected by both the American and World numismatic community. We are in this business for the long haul. However, this ad only can hint at our services. You are invited to get to know us better by calling Ron or Dennis Gillio now . . .(800) 235-6937 or in California call collect (805) 963-1345. Can we talk? We hope so!

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same charecteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63- -but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark

UNC TYPE COINS

Bid prices are for strictly graded coins. Commerical or borderline graded coins may bring substantially less.

MS-64 Commems on Want Lists

The Market in Depth

It's time for the collector to be heard! Whether the mass marketers realize it or not, the collector is the reason rare coins have exploded in value over the last ten years. Yes, mass marketing and cooperative publicity have been a big help in pushing prices higher, but, without the collector, actually demanding quality in proportion to price, there would be no distinction between a $300 MS-65 and a $700 MS-65. The collector, he knows how to grade. He demands that extra eye-appeal. Because he is willing to pay double bid for a coin he enjoys, one that meets his fancy, it has enabled many dealers to market their coins at higher levels to investor types who do not have the expertise of the collector. This may be good or bad for the investor depending upon who he buys coins from. This is another reason why certified coins sell at different levels in relation to bid; some over, some under. Some are graded commercially, without regard to time,others are graded strictly, based on a lasting relationship.

If investors would use the same wherewithal to learn about coins as they used to earn the money that entitles them to be called investors, they would be much better off and they could enjoy the title of collector. You don't see the collector out there buying certification papers; he buys coins, the ones that have eye-appeal for the grade. Eye-appeal is his guarantee. No, the collector doesn't buy one hundred 1886-P dollars in gem, but he is the one who eventually buys the gem 1921-S Walking Liberty half for his set. The collector has been prominent in the past and he will be heard in the future. When common date coins are on a par with better dates, you can bet the collector is out there looking for those better dates. Why? Because there is limited downside risk in relation to the common dates of the same series. This doesn't mean prices cannot fall; what it does mean is (that the spread between the common date and the rare date may widen as the market increases, and the rare date will not fall as far when the market slows) that it is easier to sell a better date within a series than a common date when the market slows down in a specific series.

This Week's Market

CENTS: Although business is limited in the Lincoln series, buys continue to outnumber sells. Most dealers are willing to pay bid for the few rolls they need for customers. Very few discounted lots are available any more unless they contain many spotted coins.

NICKELS: BU war nickel rolls continue to lead the Jefferson series. If it wasn't for these rolls (1942-45), there would be little or no action at all. Even now, only specific dates are needed at higher levels and roll sets receive very little attention.

DIMES: Original Mercury dime rolls remain in strong demand at current levels, while Roosevelt dimes are sluggish, and in some cases, weaker. Support for this series is lacking and a genral slow market for common BU silver rolls doesn't help any.

QUARTERS: The BU Washington series seems to be about as lacklustre as the Roosevelt series; not many higher buyers out there, yet, sellers aren't anxious to discount their inventories. The 1955-D roll is lower again this week, now at $170 bid.

HALVES: The ongoing slide for BU Franklin rolls has only slowed marginally, not subsided. Fewer dates have minus signs this week, but support is definitely lacking. The 1949-P, 50-P, 51-P, and 55-P have all fallen as a result of lower sells.

DOLLARS: BU dollar rolls have once again taken a turn to the downside. The only noticeable buyers are at discounted levels or they are asking for premium rolls. A handful of MS-64 Morgans are up again, while added interest is being shown for gem prooflikes, within current ranges.

Silver Ikes continue to be hard sellers and Anthonys are being somewhat ignored.

PROOF SETS and MINT SETS: Silver proof sets, 1956-64, seem to be on a backward roll. After experiencing some minus signs the past couple of weeks, this week finds a few more for 1956-60. Mint sets are stable at today's levels.

COMMEMORATIVES: If it wasn't for U.S. Olympic and Statue of Liberty coins, activity around the country would not only be quiet, it would be dead. Sure, commems and dollars (MS-64 & 65) receive a major share of the bidding, but the modern commems are actually trading. Add to this, the fact that these newly minted coins don't have to be graded---yet. On page three you can find prices for these contemporary issues. It took a major revamping of pages two and three so that we could include this section along with adding MS-64 commems on page two. As for MS-64 commems, the market is quite active and we anticipate this action to continue as many dealers feel there are more coins available which fall into this category than MS-65.

TYPE: Type is unmoved since last week, yet, a number of dealers have informed the CDN that they are still searching and buying strictly graded material at current bid levels. There are some nice type coins in this week's Mid-American Auction in Atlanta; we shall see at what levels coins trade.

GOLD: For the last several weeks, even months, U.S. gold in VF to MS-60 has been adjusting to lower levels. Grading has become more strict, after being quite loose in the preceding run up. This has caused a conflict among some dealers whose corresponding grading may not match each others. This is most apparent in the MS-60 $10 Indian column. Two major dealers are going in opposite directions with regards to buying and selling. To the best of our determination, one is selling bottom-of-the-barrel MS-60's at under bid, while the other is buying MS-60 plus coins at over bid. This has a net effect of no change since both are advertising MS-60 coins.

FOREIGN GOLD: (Modern & Restrikes. Traded in BU Condition.)
Bullion related gold coins in this issue are figured on a basis of gold at $340.75 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-60 (UNCIRCULATED) Strictly uncirculated coins showing no evidence of rubbing or wear. Surfaces may have contact marks and blemishes. Luster may be dull. Bag marks and scratches are acceptable. MS-60 coins may have mint spots.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. Should have full lustre. These are well above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

The World's Largest Wholesale Rare Coin Dealership* is now...

The Largest Dealer of Select Quality PCGS Coins!

Why buy low quality or average quality coins for the grade when you can buy select quality at a slight premium?

Unlike authorized PCGS Dealers who are supposed to sell *random quality*, we at NWL are in a position to carefully pick those coins that are the nicest for the grade. And it is *select quailty* that will prove to be the best investment!

WHY? Because you are not buying the holder but the coin!

Clearly this will insulate the value of the coin when and if PCGS goes out of vogue.

So call James DiGeorgia at 800-221-7433 today to discuss your PCGS needs!

NWL will also provide random quality PCGS coins at lower price levels. But then those coins will not be subject to NWL's famous Buy/Sell Program.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same chereceristics es the MS-65--but with the additional feature of deep mirror prooflike surfeces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63---but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark

AUCTION AND SHOW ACTIVITY BRISK

MS-64 Dollars Undergoing Profit-Taking

The Market in Depth

The Georgia Numismatic Association has come and gone (the Waverly Hotel was wonderful as always). Despite an overall slow market, the show was very successful for most of the hundreds of dealers that showed up. The public was sparse Friday, but Saturday filled the spacious bourse room. True, many series are lower, but most are being actively traded at these new lower levels. BU silver rolls of dimes, quarters, and halves (1955-64) still are finding new recent lows as support appears to be 5%-10% under bid each week, even after various dates drop. There are very few bid buyers of most dates. Common date MS-64 dollars faced a quick turnaround and fell about as fast as they had been rising. This correction is due to numerous lots and singles being available at under bid levels. The good news is that there was solid support at $275 on up. Common U.S. gold, in most cases, seems to have reached a level of strong support for the majority of denominations in VF thru MS-60. With very few exceptions, prices are solid, if not higher. As reported a couple of weeks ago, the drastic downturn of prices has apparently ended, as many dealers are once again recommending properly graded and priced coins to their clients.

Remember: Properly graded and priced coins go hand-in-hand and without the two together, your customers don't have a chance. And this, makes everybody look bad. It's time that we all worked together in our industry in an effort to get more positive publicity instead of the negative. Let's show the public what we can do for them. Let's encourage the collector to bring other new collectors into the industry. Sure, it will take time and patience, but the new collectors are the ones who will spend big bucks in the future.

The Mid-American Auction had its ups and downs attendance-wise depending on the material in that particular session, but, when attendance did appear thin, the active bidding more than made up for it. Overall, consignors are probably very happy with prices realized of over $2.2 million. Type coins seemed to be stable and even stronger as prices realized were commensurate with the actual grade. Dollars also received active bidding, with some commems being pushed beyond current levels. The following rundown is but a few of the highlights:

Denomination	Grade	Price Realized
1899 Indian Cent	MS-69/69	$ 1,045
1825/3 Bust Quarter	MS-65/65	$14,300
1882 Seated Quarter	PR-67/67	$ 5,060
1897-O Barber Quarter	MS-65/67	$11,000
1795 Draped Bust Dollar	MS-60/60	$13,475
1885-P Morgan Dollar	MS-65/65 P/L	$ 1,650
1886-O Morgan Dollar	MS-63/63	$ 660
1889-CC Morgan Dollar	MS-64/64 P/L	$11,550
1894 Morgan Dollar	PR-67/67	$ 9,900
1856-D Gold $1	AU-55/60	$17,050
1860-D Gold $1	MS-60/60	$18,150
1861-D Gold $1	AU-55/55	$13,475
1855-S Gold $3	MS-60/63	$13,750
1907 Gold $20 High Relief	PR-65/65	$35,750

This Week's Market

CENTS: In an effort to stress the importance of accuracy, it must be pointed out that the warming trend of the last few weeks for BU rolls of Lincolns is very limited. Most buyers are looking for small quantities of specific dates and will not accept excessive numbers of inferior (spotted) coins within the rolls. There are still various lot deals available of mixed dates that are offered at fractions of bid. Usually the majority of the rolls are of less than desirable quality, which is the main reason they are difficult to sell in the first place.

NICKELS: The light is very dim at the end of the tunnel. In other words, if there's going to be an improvement in the BU Jefferson series, it appears to be a ways off. The only consistent trading lately has been in the war nickel rolls, and there, only for specific dates.

DIMES: The late-date BU silver rolls appear to be in an ongoing downward trend. The only noticeable support is usually 5% under the current bids. How low can they go before sellers refuse to discount them any further. However, there are plus signs for a few harder to find dates in the early 1950's.

QUARTERS: The BU Washington series is duller than a lead nickel. There are no visible bid buyers, especially from 1956 thru 1964. As such, numerous minus signs appear for most of these dates.

HALVES: The BU Franklin series is preparing for the playing of "Taps". Lots of sellers at discounted levels and buyers are indifferent unless prices are very cheap. Maybe this can be considered a good buying opportunity. The answer should be more apparent over the next few weeks.

DOLLARS: BU dollar rolls continue to lose ground as many of the usual major buyers are temporarily out of this market. In Atlanta, very few buyers were in evidence and you can bet their buys were under bid. And yes, sellers did let go of many rolls at discounted levels.

PROOF SETS and MINT SETS: Silver proof sets, from 1956-64 remain a little sluggish. This seems to be threatening to carry over into the earlier sets, 1950-54.

COMMEMORATIVES: Although plus signs aren't evident in MS-64 & 65 (numerous MS-63's are higher), commems remain very active and in demand. Six coin Statue of Liberty sets continue hot and the cherrywood case even has bidders busy. Buyers offer anywhere from $50 to $100 for the case by itself.

TYPE: There seems to be some stirring in type coins as several dealers are again recommending them. Prices remain steady, however, in all grades. In 64 and 65 material, there does not appear to be enough coins (that make the grade) to go around. Most buyers are trying to quietly stock up.

GOLD: In determing bid prices, especially in MS-60 U.S. gold, it must be pointed out that commerical uncirculated, slider, or excessively bagmarked coins will not command bid levels. As with any grade, accurate grading is of the utmost importance.

FOREIGN GOLD: (Modern & Restrikes. Traded in BU Condition.)
Bullion related gold coins in this issue are figured on a basis of gold at $341.75 per ounce.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63--but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark

UNC TYPE COINS

Bid prices are for strictly graded coins. Commerical or borderline graded coins may bring substantially less.

DEALERS EXPECT STRONG LONG BEACH SHOW

Statue of Liberty Coins Most Active Area of Market

The Market in Depth

The big concern this week involves the apparent reversal last week of common MS-64 Morgan dollars. There have been large quantities of MS-64's sold into the marketplace the last couple of weeks and several major buyers have lowered their buy prices. Other major dealers will still pay over bid for many dates, but they require certified coins, usually PCGS. Most of the major buyers feel that this will be a short period of adjustment and after the available material is absorbed, the market will once again move forward. We will have to see if this optimism is warranted or not. In fact, with the Long Beach Show in full swing when this issue is released, we will have solid information to report for the next issue.

* It does now appear that several buyers will buy large quantities of common MS-64 dollars at current bids.

For the first time in a very long while, there seems to be some resistance at today's levels for MS-65 dollars (common dates, of course). Although, once again, buyers will take various certified coins at current levels, they are reluctant to buy non-papered coins at these levels, being unsure that they can be "papered". At $700 bid for a common 'S' mint, dealers cannot afford to make a mistake. And if dealers are afraid of making mistakes, where does this leave the customer? Also, at $700 bid, there are a lot of former higher buyers that are now sellers at these levels. The only problem here is that sellers don't have any quantities to sell and the strong buyers still say "load me up". In effect, what the sellers are saying is that they are not recommending them to their customers at these levels. The buyers are saying, they can go higher. So, what we have is, sellers would sell them if they had them and buyers will buy them if the sellers can locate them.

For many dealers and their customers, certified coins are a guarantee, if only partial, that others will agree with the grading. This, of course, does not guarantee a value, as a price guarantee can only be made by a company that has a two-way (buy/sell) market. Even then, and this point is just as important in the coin industry as it is in <u>any</u> other business in this country: A guarantee is only as good as the company behind it; no more, no less. Education of your customer is most important to, not only your business, but, to the future of the whole industry. It is imperative that the novice learn the ins and outs of this business just as they would any other, for this is not an endless upward market. There are highs and lows, ups and downs. Many series have great potential for future profit if bought at fair prices for the grade, but, this is a typical supply/demand structured industry and anybody who thinks that knowledge is not imperative is in for a big shock one day.

As strong as the Statue of Liberty series was, it only took a few days and a larger supply than demand to reverse this trend. Activity remains intense, but prices are generally lower across the board. This is a classic example of profit-taking.

This Week's Market

<u>CENTS:</u> BU Lincoln rolls seem to be receiving added attention at bid levels, especially for 1934-53, all mints. Of course, buyers are specifying "nice rolls only", but then again, why should this series be any different than any others. No, you won't find any plus signs, but the market seems to be solidifying.

<u>NICKELS</u>: BU war nickel rolls keep the Jefferson series from being downright dead. There are several buyers at current bids, with some dealers wanting specific dates at advanced levels. The rest of this series is being thoroughly ignored. An occasional roll or two of original Buffalo rolls may be offered, but usually sell rather quickly.

<u>DIMES</u>: Original rolls of Mercury dimes remain strong at current bids with just a couple dates moving higher. Buyers are many for the seldom encountered original rolls. Several Roosevelt dime rolls are higher, 1951-S - $425, 1955-D - $62, 1955-S - $56, and 1957-D - $75; but, just as many rolls are lower, 1946-S, 48-P, 64-P & D.

<u>QUARTERS</u>: The BU Washington quarter series apparently has not reached bottom yet. Each week a few more dates decrease as sellers become anxious, even if they have to take losses. The downward trend of the market alone, is enough to erode capital over a prolonged time period. The 1955-D roll has obviously suffered as much or more than any other date.

<u>HALVES</u>: Most dates within the Walking Liberty series remain steady and easy to sell as original rolls. The only two exceptions seem to be the 1946-D and 47-D. These dates seem to be available more often than others and are usually discounted.

The Franklin series, as a whole, seems to have no bottom. Each week a number of rolls are lower as sellers treat several rolls like the 'plague', just wanting to get rid of them. The 1963 rolls are now bid at $100 per.

<u>DOLLARS</u>: MS-60 dollars are extremely weak as the majority of BU dollar rolls chase prices lower. Prices sure seem cheap, but a support level, apparently has not been found yet. Somewhere within these price levels, there has to be a good buying opportunity for the buyer of these rolls.

Several minus signs appear for Ike and SBA dollars. This type of material (modern) usually falters during the summer months.

<u>PROOF SETS and MINT SETS</u>: Late-date proof sets are readily available, and, as such, most have lower bids this week. Most messages are of the sell variety and are usually at discounted levels. Some of the early proof sets (1952 & 53) are a little sluggish and are usually available, while the 1950 & 51 sets remain difficult to locate.

<u>COMMEMORATIVES</u>: Changes are sparse this week, but the silver commems remain rather strong. Several major dealers will buy the majority of issues at bid or higher for MS-64 & 65 coins, but are adamant about strict grading. Some dealers who previously felt only MS-65's were the way to go, are now considering MS-64's, also. Well, better late than never.

<u>TYPE</u>: If the major dealers who are speaking of the upcoming price increases for 64 and 65 type are serious, they will have to do it without much material. Availability of nice coins is rather thin and any push at all can move this market quickly.

<u>GOLD</u>: Although the chart does not indicate much in the way of changes, the U.S. gold market seems to be rather bullish at this point. Even with the few minus signs, these issues are actively traded. Many dealers feel this market is at a low level and it may be "the lull before the storm".

FOREIGN GOLD: (Modern & Restrikes. Traded in BU Condition.)
Bullion related gold coins in this issue are figured on a basis of gold at $341.75 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

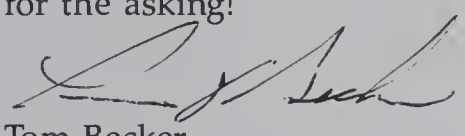
The Ultimate Protection for Rare Coin Buyers!

Coins purchased as part of our "ANACS-Plus" Program offer you the ultimate protection—the finest program available today. Each coin has these characteristics:

*Authenticity ..... Accompanied by a certificate issued by the American Numismatic Association stating its opinion of authenticity. This statement of authenticity is a vital protection!



*Grade ..... Accompanied by a certificate recently (late 1985 or 1986) issued by the American Numismatic Association stating its opinion of the grade. The ANA is a nonprofit organization and does not buy or sell coins. Few question the objectivity of the ANA Grading Service. And, surveys show that ANA certificates are overwhelmingly the most popular!

*Photography ..... Each coin is accompanied by a sharp professional photograph taken by the ANA—with the master negative kept on file at ANA headquarters. In this way you can be sure the coin you get is the one on the certificate—a protection against switching—and a permanent record in the event of loss.

*Expertise ..... Each coin is further evaluated by Tom Becker, Q. David Bowers, and Raymond Merena to be sure that it is: well struck, well-centered, on a quality planchet, and with aesthetic appeal (attractive toning or mint lustre, etc.). In other words, it is among the finest of its kind! (Grading alone is only one determinant of a coin's value—two coins can be in the same grade and, if the aesthetic appeal differs, one can be a bargain at $500, for example, and the other could be overpriced at $400)!

*Resale ..... When time comes to sell, we welcome you to offer your coins to us. Over a long period of years (since 1953) our past clients have been among our most important sources for inventory. And, we also offer what we consider to be the finest auction service in the field.

Are you an active buyer? Do you want superb quality, excellent value, and fast service? If so, we invite you to get acquainted today. We've just published a listing of "ANACS-Plus" coins for sale—coins with full ANACS certification (of recent date, too) plus the added evaluation of our expert staff. A copy is yours free for the asking!

"CAN WE TALK?"

Good. Because we want you to meet the real Mike DeFalco:

The Numismatist

One of the only coin dealers I know who really has a plan for getting *all* of his clients out. And remember, you haven't made a killing in rare coins until you sell.

— Gary North
Editor, REMNANT REVIEW

I have bought and sold coins with Mike for nearly 10 years, and every deal has been clean, quick and friendly. When customers ask me to recommend some of the best dealers in the country, Mike is always on the list.

— Bruce Amspacher
Co-Founder, PCGS

Mike DeFalco, a quality guy with quality coins. Big League all the way. I have recommended my customers to him for over 5 years.

— Dick Armstrong
Armstrong Rare Coins

The Company

Mike DeFalco is one of America's most knowledgeable Numismatists, recognized industry-wide for his stand on integrity and quality. Mr. De Falco and his company can count on my wholehearted endorsement of their expertise and record of providing honest and fair treatment to their clients.

— Martin Paul
President
The Raritics Group, Inc.

I know where to go when I want an honest and upfront Bid or Ask for coins — Mike DeFalco. A refreshing change from most dealers' attitudes.

— Gary Fernandez
Fernandez/Armstrong
Rare Coins

Mike DeFalco has gained a great deal of respect in the coin industry, and I personally think his portfolios are accurately graded and top quality.

— John Albanesc

The Newsletter

"I subscribe to every major rare coin advisory, and up to now, thought that David Hall's Inside View was the only truly professional newsletter. Well, MARKETWISE is definitely its equal, and is one of the only two newsletters that I would personally recommend."

— Hannes Tulving, President
HTRCI

"Each edition of MARKETWISE gets better and better. The January, 1986 issue was a real treat. There was not one coin or projection that I disagreed with.

— James M. DiGeorgia,
Numismatic Wholesalers, Ltd.

"What I like best about MARKETWISE is that you are living in the real world, speaking like a human being as opposed to 'Mr. Expert' and providing your readers with practical advice."

— Les Fox, Publisher
The Fortune Teller

The Bottom Line

". . . I received your check for the coins I sold back to you. Your offer was very fair and somewhat surprising. The past six weeks I had been trying to sell back coins to other dealers I'd done business with, and I was getting the usual run-around or ridiculous offers. It's nice to know there is at least one honest dealer out there. Thank You again."

— D.R., Hazel Park, MI

"I appreciate the quick and professional mode in which you operate. You make 'numismatic investments' a reality. I will surely be doing business with you in the future as I build my own rare coin collection for both pleasure and profit."

— G.G., Phoenix, AZ

". . . You have an excellent reputation for fairness and integrity in your business. You are one of four or five that I instinctively believe I can trust for an honest and fair relationship."

— J.C., Valparaiso, IN

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65---but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS 63---but may also include some MS 60 and MS-65 examples. For strictly graded MS 65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

UNC TYPE COINS

Bid prices are for strictly graded coins. Commerical or borderline graded coins may bring substantially less.

U.S. GOLD STRONG ACROSS THE BOARD
Type Coins Show Positive Indications

The Market in Depth

As usual, the Long Beach Coin Show attracted large numbers of dealers, investors, and collectors, alike. Prices were strong in several areas, but, the biggest drawback these areas are experiencing is a lack of material, which, of course, is a primary reason these areas are healthy in the first place. The series which appear to be the strongest at this time are:

1. Morgan and Peace Dollars; MS-64 and 65.
2. Mercury Dimes; MS-65 (non FB).
3. Silver Commemoratives; MS-63 thru MS-65.
4. U.S. Gold; all grades.
5. Type coins; Proof and MS-64 and 65.

All of these areas have a large number of dealers behind them and they are willing to buy large quantities. Although, specifically, type coins and U.S. gold (MS-64 & 65) have a very thin supply and as strong as they are on paper, there is very little that actually trades. Anyone holding this material is well aware of its rarity and will holdout for the long-run or for prices well in advance of current levels.

Silver dollar prices (MS-64 & 65) appear solid at current levels, although premiums for PCGS coins had been extremely strong up until the last two-three weeks. Most of the common dates had been commanding a 20%-30% premium, but this has now settled back to about a 5%-10% premium. This premium is due to the costs incurred in having the coins graded and the time it takes. Now that there are more coins graded and into the marketing system, it is apparent that the larger premium was a result of too short a supply for the excessive demand. The demand is still strong, but dealers do not need to pay such high prices to corral the coins they need to satisfy their individual customers.

A secondary reason for the tightening of the premium is that many wholesalers (those that do not have investor or retail clients) received coins back from PCGS and sold them to the market-makers of PCGS coins, thus creating a tighter market. Over the next few weeks we will see what effects the larger supplies will have on the market.

Mercury dimes (MS-65 non FB) are extremely active as several buyers are willing to pay bid and some will even pay in excess of bid. Available quantities are modest, yet, in much more supply than the other series mentioned.

MS-63 thru 65 commemoratives are in the same boat as silver dollars in MS-64 & 65. Yet, availability is much thinner for MS-64 & 65 commems. Several dealers remain in this market for properly graded coins. Again, PCGS premiums have been lowered from their highs of a few weeks ago. The number of buyers for MS-63's seems to be increasing, but most are within current ranges.

This Week's Market

CENTS: This week finds only minimal changes in the area of BU Lincoln rolls. Activity has been light, but some dealers are still looking for various dates at today's bids. Spotted or otherwise inferior rolls are usually heavily discounted.

NICKELS: BU war nickel rolls are mixed. The 1942-S ($415) and 1943-S ($155) are higher, while the 1943-D ($120) and 1945-S ($120) have fallen. The remaining dates are unchanged. The rest of the Jefferson series continues sluggish including the 1950-D roll which is lower at $195 bid.

DIMES: Many dealers continue their search for original Mercury dime rolls at current levels. This market helps fuel the MS-65 (non FB) buyers as one can see in this week's Monthly Summary.

BU Roosevelt dimes have not reached a level of support yet, as several dates fall, once again. Minuses are not restricted to just late-dates.

QUARTERS: BU Washington quarters fare no better than Roosevelt dimes. Although, the majority of minus signs, and there are many, are confined to rolls dated after 1955. As long as interest wanes week after week, more sellers appear at lower levels.

HALVES: The BU Franklin series continues to fall like a "lead balloon". Half of the series indicates minuses this week and even BU sets are down to $600 and this may be wishful thinking. This series is decidedly weak.

DOLLARS: It appears, once again, that it is necessary to explain what is meant by original dollar rolls. Bid represents a mixture of MS-60 up to MS-63 coins of typical strikes for the date. There will not be a fixed number of any grade within a roll. It is obvious that the upper end MS-63's, 64's, or 65's would be removed from these rolls because of their high values. But, any further cherrypicking will lower the quality of the roll to MS-60 - MS-62 or less, which are considered to be original coins, nevertheless, put-together. These rolls will only command MS-60 money for the date. Any better quality rolls which are left unpicked are considered premium rolls and the majority of dealers will pay over roll bids. For the time being, original rolls (MS-60/63) are going unsold at current levels at most coin shows. Premium rolls will sell almost immediately at prices commensurate with quality.

PROOF SETS and MINT SETS: A few of the silver proof sets are somewhat weaker and have fallen, but, unlike some series where material goes unsold, at least, transactions take place. Mint sets are basically unchanged as they do not receive near as much activity as proof sets.

COMMEMORATIVES: The various Statue of Liberty coins and sets continue to sell at lower numbers. The recent runup was not unexpected, just as this selloff comes as no surprise to most dealers. It will be interesting to see what prices do between now and Independence Day.

TYPE: Although price changes are minimal, type coins firmed up markedly at the Long Beach Convention. More dealers are now in this market and this will have a major effect on the available supply, especially proof and MS-64 and 65 material.

GOLD: The majority of U.S. gold coins seemed to be in somewhat short supply at the Long Beach Show. Of course, strict grading is an absolute necessity at this time; it should be all the time. The majority of the marketmakers could not locate enough material to satisfy their needs.

FOREIGN GOLD: (Modern & Restrikes, Traded in BU Condition.)
Bullion related gold coins in this issue are figured on a basis of gold at $350.00 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

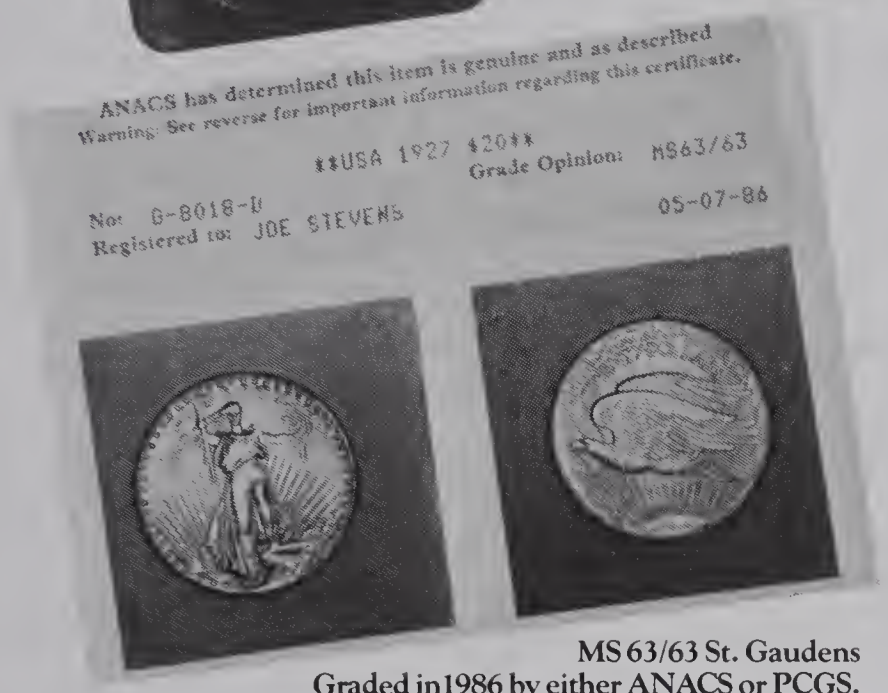
MS-60 (UNCIRCULATED) Strictly uncirculated coins, but may have evidence of bag or other contact marks, or may have minor nicks or scratches. Should be free of major defects, but may not have full lustre.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. Should have full lustre. These are well above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.



MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

OUR GUARANTEE

All coins purchased from Heritage Rare Coin Galleries are covered by an unconditional 45 day return privilege, one of the longest in the industry.

It is also guaranteed that all coins sold are genuine. As proof of our certainty that no counterfeit or altered coin can escape our attention, it is also guaranteed that we will refund the full Heritage purchase price plus 15% interest per year compounded annually on any non-authentic coin purchased through Heritage Rare Coin Galleries. If you request auction for liquidation, Heritage Numismatic Auctions, Inc., after acceptance, will catalog your coins at the same grade which you purchased them.

Each and every coin sold by Heritage is graded on both the obverse and reverse, according to the grading standards practiced by the Numismatic Certification Institute (an affiliated company). It should be understood, however, that grading is an art and not a science, and opinions on grading and value can and often differ between experts as well as other grading services. The purchaser is therefore encouraged to carefully inspect and evaluate all coins during this 45 day period. This guarantee applies to all purchases after January 15, 1986.

A Few Really Rare PCGS Coins For Sale

Some coins are common. Some are rare. And some are "really rare." The three coins listed below are really rare. They are also among the finest in existence. They aren't "cheap" and they never will be. Don't wait that extra minute to buy one or you might spend a *lifetime* searching for another one.

1916-D Mercury Dime, MS66 FSB.
A pristine example with a razor sharp strike, immaculate surfaces and splendid iridescent toning. The 1916-D Mercury dime is one of the most publicized and important United States coins. It is truly an American numismatic classic. The presently offered specimen is unquestionably one of the finest known and most beautiful in existence. Auction records (for inferior specimens) in excess of $10,000. ..... **$9500**

1921-S Walking Liberty Half Dollar, MS65.
Easily *the* finest 1921-S half that we have ever seen, and most likely the finest known. The strike is full and the untoned surfaces display luster equal to that of P-mint issues in the 1940s. If you want the ultimate Walker collection, you should start with this, the ultimate Walker. This specimen traded hands between dealers at last year's ANA for $31,500. ..... **$28,000**

1922 Peace Dollar, Matte Proof 66.
The surfaces are flawless and exhibit the steel-grey color found on original matte proof Peace dollars. During the past two years, a handful of specimens have appeared on the marketplace (representing most of the known specimens), but this coin is easily superior to any of those. There are probably only five or six "high relief" matte proof Peace dollars known of both the 1921 and 1922 issues. I am convinced that this is the finest known of either date. An opportunity of immense significance for the silver dollar specialist. This specimen came out of Auction '85 at $37,400. ..... **$39,500**

Please call Van Simmons at (714) 553-0110 to discuss these one of a kind rarities.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65---but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck ---and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63---but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

UNC TYPE COINS

Bid prices are for strictly graded coins. Commercial or borderline graded coins may bring substantially less.

COMMON GEM DOLLARS ADJUST

Dollar Rolls Reach Support Levels

The Market in Depth

A couple of weeks ago we wrote about the apparent resistance of MS-63 dollar (common dates) prices at current levels. At the Long Beach Coin Show this resistance was readily visible to almost everyone, but we could still find buyers at current levels. It has now become obvious to those few higher buyers that they cannot continue to support these levels alone. In the past few weeks there have been quantities available of most common dates and the market has not been able to absorb them. We have not found any bidders for MS-65 common date dollars who have not lowered their buy prices substantially. This weakness or adjustment (or correction) has many dealers concerned with the short range outlook for the previously "always in demand" MS-65 dollars. While others feel an adjustment is necessary and even healthy. It does seem appropriate for this to occur at this time of the year, which, except for the last couple years, is characteristically called a general market slowdown or "summer doldrums".

In this current market, there is a wide variance of opinion as to the relative strength or weakness of the MS-65 dollar market. It seems that all of the higher buyers have lowered their buy prices and sellers are more readily seen. Since our bids are not for commercial graded coins, if dealers qualify their buy prices as select or premium for the grade, it appears that they are looking for the next higher graded coin. Thus, gem MS-65 dollars (commons) are lower this week, but anything grading higher will still command premium money. At this point, one must draw their own conclusions. Is this market actually weak or just adjusting to new levels?

Since the "high-riding" MS-65 dollar market has backed up somewhat, and this has long been considered the leading market indicator, what can be said for the rest of the market? As you know, BU rolls have fallen over the last few months (cents thru dollars). Nevertheless, most unpicked rolls or fresh deals can be negotiated almost immediately among the marketmakers around the country. This will probably not change, which means there are buyers for all grading ranges within a particular roll. Those most active, at this time, are original Buffalo nickels, Mercury dimes, and Walking Liberty halves. Whenever the other series reach what most dealers feel is a bottom they will once again become strong and active.

Recently, many dealers have spoken of the merits of better date coins within a particular series which may sell for little or no premium over the common dates. With the overall market being somewhat slow, these dealers feel it is a good time for their customers to insure their positions and secure their futures by purchasing the less commonly available coins rather than the ones most often found in show cases at coin shows. This will make sense to those of you who study numismatics, but may be more difficult for those who do not see lots of coins, but read too many retail ads.

This Week's Market

CENTS: The BU Lincoln roll market remains on the positive side, but still, transactions are few and far between. The interest generated in this series is by just a few dealers, while the majority of the dealers do not care that it exists.

NICKELS: BU Jefferson nickels are beginning to receive a little more attention, as a few dealers try to buy what they feel are underpriced dates. As it is, this is limited to only 1940-D, S, 1941-D, S, all now bid at $62.50 per roll, 1942-S at $425 and 1955-P at $11. BU War nickel rolls remain solid at today's levels.

DIMES: BU Roosevelts continue to slide. Not many dates are lower, but all dates seem to be difficult to sell. Even some dates that dealers feel are hard to locate may go unsold at lower levels, such as, 1946-S, now at $145 bid. When this series, along with Washingtons and Franklins were hot, one could not find enough to satisfy demand. Now it seems that the only buyers are always at least a little back of bid.

QUARTERS: This is the first time in many weeks that we have no minus signs in the Washington quarter series. This doesn't necessarily mean that it is strengthening, but for those who look for indicators, this may be a positive one. In many cases, various dates are at price levels that seem underpriced and are hardly ever seen traded. This goes for some dates as late as the early 1950's.

HALVES: Although gem Walking Liberty half dollars seem to be solid at current levels, it appears that more and more BU rolls are being offered at lower levels. Dealers are not paying the premiums that they once were for some dates. They are requiring more gem coins within these rolls than they were in the past. This presents somewhat of a problem, in that, we specify a mixture of grades within original rolls with no exact number of gems or near-gems required.

DOLLARS: Even though BU dollar rolls are lower again this week, it now seems there is support at or within close range of these bids. This past week, there have been a few buyers for a limited quantity of rolls at the $525 level. The next few weeks should tell us where this market is headed from here. We have been told by several dealers that they would be "in" at the $500 level. But, this remains to be seen. Original bags, unpicked, will still command premiums.

PROOF SETS and MINT SETS: Silver proof sets from 1956 thru 1964 continue to adjust downward. There are only limited buys of most dates and almost always at lower levels. The 1981-S Type II proof set is now bid at $205. It is unlike the 1979-S Type II, in that, the whole set is worth much more than the sum of its parts. Obviously, there are very limited quantities of complete sets available, although, there are many sets that contain a few Type II specimens.

COMMEMORATIVES: Commem prices are solid for each grade, but there is a definite slowdown of advanced bidding. Many dealers feel some gem commems are too high, but there are still some solid bid buyers.

TYPE: Type coins seem to be gathering steam. No, you won't find a lot of changes, but there are many more bid buyers than there were a few weeks ago. Barber quarters are now bid $4000 in PR-65.

GOLD: It seems that the overall weakness in the market has caused a general adjusting of buy prices for MS-60 and lower U.S. gold. The difference here is that even with lower prices coins continue to trade, whereas, in some other series, lower prices may create a lack of trades.

FOREIGN GOLD: (Modern & Restrikes. Traded in BU Condition.)
Bullion related gold coins in this issue are figured on a basis of gold at $336.75 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-60 (EXTREMELY FINE) Extremely attractive coin with overall sharp detail and contrast. Will have minor bag marks and/or slight abrasions from light cleaning. Should have full lustre. Must have eye appeal.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks may show only a slight weakness of strike. Should have full lustre. These are well above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

The flaw could be so tiny. The value could be so great. You Need NCI.

When you're spending a lot of money on a coin, you want to feel confident that you're making the right decision. You need the expert advice of an independent grading service . . . a third party, whose only interest is to grade your coin accurately, fairly, and quickly.

NCI – the Numismatic Certification Institute – is an independent grading service that puts decades of expertise as close as your mailbox. NCI graders are qualified numismatists, who use real-world grading criteria to analyze your coin at every level. Bagmarks, wear, luster, toning, eye appeal, and other factors are carefully considered. It's a tough process . . . but a fair one. And it takes only ten business days or less.

The worth of an NCI grading and authenticity opinion goes far beyond the certificate you receive.. NCI authenticity opinions are guaranteed and insured. And dealers tell us that coins with NCI certificates sell faster. In fact, many dealers feature NCI certified coins in their advertising.

So start feeling a lot more comfortable about your coin buying – and make your own coins sell faster. Get the third-party opinion with real value: NCI. Call Tim LaPointe or Mike Sherman at 800-527-9250 for more information, today.

NUMISMATIC CERTIFICATION INSTITUTE

The Heritage Building • 311 Market Street
Dallas, Texas 75202
(214) 742-2200 • (800) 527-9250

Provided that the Numismatic Certification Institute (The Institute) agrees with your grading of the submitted coin (if requested) and determines that the coin submitted is genuine, you will be issued a photographic certificate which shows a color photograph of the coin, its certified grade, and the value of the coin you have stated on the reverse side of this form. The Institute will guarantee that the certified coin is authentic, and will insure the authenticity of the coin up to the value you stated on the reverse side of this form, plus an amount equal to 15% of such stated value per year for each year the certificate has been outstanding before the coin is proven counterfeit. The value you stated will also represent the amount of insurance coverage against theft or other loss of your coin while in the possession of the Institute. If your coin is lost or stolen while in the possession of the Institute, such stated value shall be paid to you in full satisfaction of the obligations of the Institute. The Institute does not guarantee or warrant that the coin certified has or ever will have a market value in the amount you have stated as its value. The Institute only uses your stated value to determine the amount of insurance coverage and the fee to be charged.

The Institute will arrange for the certified coin to be offered for sale at public auction, at your option, through The Institute's affiliate, Heritage Numismatic Auctions, Inc., at the same grade as certified at a discount of 20% off of the seller's commission. For your option to be exercisable, however, the coin must be maintained in the same condition as it was as of the date of certification. Your certificate, along with the option to sell at public auction, is fully transferable.

If The Institute cannot agree with your requested minimum grade, then you will be charged a $5 fee, $2.50 for postage and handling, and the registered mail fee. If The Institute cannot certify your coins as genuine, and provides you an opinion that the coin is not genuine, then you will be charged the full fee of 2% of Owners Stated Value Plus $10 per Coin, $2.50 for postage and handling, and the registered mail fee. In order to transfer a certificate to another owner, please return the original certificate along with the $10 transfer fee.

Grading is an art, not a science, and therefore the opinion rendered by this certificate may not agree with the opinion of others (including trained experts), and the same expert may not grade the same coin with the same grade at two different times. For a permanent record, the grade assigned on this certificate on this date represents our opinion which is based on our experience and prevailing market standards. Grading standards have changed in the past, and as time passes and market conditions change over the years, they may do so again in the future.

The Institute guarantees that within 10 business days of receipt of your coins and your completed Request for Certificate, your coins and your certificate (or a disclaimer of opinion or an opinion that the coin is not genuine) will be sent by Registered mail to you. If the Institute fails to meet this deadline, your certification fees will be refunded when your coins are returned.

Over 80,000 coins have been certified by the Professional Coin Grading Service.

HERE'S THE EASY WAY TO HAVE YOUR U.S. COINS CERTIFIED AND GRADED NOW BY P.C.G.S.

And here are good reasons to utilize the services of Ronald J. Gillio Inc.:

1 We have one staff member who is devoting full time to coordinating between collectors, other dealers and the P.C.G.S. If you have any questions either before or after you submit your coins, contact Gene Marasco.

2 Our convenient geographic location assures you of the fastest possible turnaround time.

3 P.C.G.S. will not grade any coins that have been harshly cleaned or damaged. We will do our best to screen any coins submitted, and will not submit such coins to the P.C.G.S. whenever we detect them. This will save you unnecessary fees—and we won't charge anything extra for this service.

You will receive a bill for the appropriate postage along with your P.C.G.S. sealed and graded coins. For this professional service contact:

Where is the Real Value?

We asked the following experts which coins on the market are the <u>most undervalued</u> and have the highest potential for dramatic gains?

John Albanese - "...Rare Type and Gold..."
Bruce Amspacher - "...Rare Type and Select Gold Issues..."
Silvano DiGenova - "...Type and Gold, MS & Proof..."
David Hall - "...64 & 65 Rare Type, Gold, and Proof Gold..."
Jim Halperin - "...Rare Type and Gold..."

Why wait 30 to 90 days for relatively common coins like Silver Dollars, Walkers, Mercurys, and Buffalos?

GEM TYPE ON WANT LISTS
Dollar Rolls Firm at Current Levels

The Market in Depth

The summer slowdown may be upon us, but, business is certainly what you make it. If you think it's going to be slow and you don't want to work that hard this summer, then your business will most definitely be off. However, consider the fact that several organizations continue to do a large volume of buying and selling. Yes, some prices are adjusting downward, but this can be a good time to buy more coins for your money if one takes the right approach and discovers those issues which appear to be good buys at today's levels. Although many dealers have become cautious in their buying practices, this is a direct result of their customers who generally restrict their buying habits throughout the summer months. This will also cause a certain amount of material to become over abundant in dealers' inventories.

Many dealers are now requiring certified coins at their buy prices and "unpapered" buy prices fall off as much as 20% or more. Some of the marketmakers will not even buy coins at their buys unless they are certified; others look to buy only premium quality coins that they can "cherrypick". The premium quality material remains strong as some investors will always want the best available.

The valuation of certified coins seems to have its problems from time to time. Whenever someone comes up with an answer, eventually another problem will arise. As ANACS grading interpretations have changed over the years we have found that coins graded more recently are generally worth more. This fact is well-known and understood by many, but not all numismatists. Coins graded in 1985 and '86 have been worth around bid levels for most series, but now, dealers are even discounting some 1985 papers (slightly) just as they have been 1984, '83 and so on. The discount may not be as large, but the idea is effectively the same. PCGS coins which trade "sight unseen" will command two trading levels. One is exactly as is stated, "sight unseen" and is a discounted bid, thus, protecting the buyer. The other level is a higher bid which might be exercised after the coin is seen and it is determined that its quality is on the upper end of the grading scale. The conclusion to draw at this point is that although certified coins are an up and coming marketing tool which increases everyone's ability to deal, coins must still stand on their own merits or knowledgeable buyers and sellers will not get together. Every dealer learns from experience and every dealer is master of his (her) own education.

This Week's Market

CENTS: BU Lincoln rolls occasionally receive buys for specific dates at current levels. Most buys are limited to 5 or 6 rolls (dates in the 40's), while some like the 1955-S is wanted in 200 roll quantities. The 1955-S is now bid at $9.50 per roll. The 1970-S sm date roll is extremely popular with several dealers as they will now pay at least $480.

NICKELS: BU nickel rolls (Buffalo and Jefferson) were very quiet this past week. Even the most recently active war nickel rolls were relatively quiet as most bidding took place within current levels.

DIMES: Every week seems to find a few different dates within the Roosevelt dime series available at discounted prices. This week, the 1947-D and 48-S appear lower along with the more common 1956-P, D and 59-P rolls. Mercury dimes remain consistent at today's levels, especially, original rolls and MS-65's (non FB).

QUARTERS: Although a few minus signs appear for early Washington quarter rolls, the backsliding seems somewhat curtailed at this time. The 1941-P, 45-P, and 46-S are lower as rolls were discounted, but quantities were not endless. The 1982-P and D rolls are in strong demand at higher levels and supplies are very thin as noted by the fact that there is no ask price listed.

HALVES: Lower prices for BU Franklin rolls have not subsided. Several dates are lower as discounts can be found on a daily basis. Not all rolls are continuously weak, but it would be difficult to find many dates which would command bid if offered for sale.

DOLLARS: As we stated last week, BU dollar rolls seem to have mild support at current levels. Several dealers will pay $525 for limited quantities, while many more are in the ballpark at $500 and up. Buyers for common MS-60 singles (Morgans) can be found in the $25 area. Several of the common MS-65 dollars have slipped another $25 this week as trading continues somewhat cautiously.

PROOF SETS and MINT SETS: Silver proof sets from 1950-55 are lower, while sets from 1959 to 1963 continue to trade at discounted levels, yet, buyers are within 2% of bid on the later sets. The 1970 mint set has jumped to $14 bid, while the 1981 set fell to $8.25.

COMMEMORATIVES: Silver commems remain in strong demand in all grades. Nevertheless, a few issues in MS-65 have corrected slightly as lower sells have been monitored. This occurs usually for issues which normally come nice in the first place and at the higher levels dealers were demanding MS-66's or 67's.

TYPE: Although not reflected with plus signs, the MS and PR-65 type market is firming up nicely. Many dealers are studying the comparative availability of gem type coins to gem dollars and they find that there are far fewer type coins available at current levels compared to gem dollars at current levels. This may be the main reason type is strengthening and gem dollars are correcting. Many silver dollar dealers are shifting their loyalties and recommendations over to type.

GOLD: The most obvious change this week is the MS-63 St. Gaudens, which is lower at $1000. Several coins are offered on a daily basis at discounted prices. MS-64 and 65 gold is quite stable at today's levels. There are a few minor adjustments for MS-60 and lower quality gold.

FOREIGN GOLD: (Modern & Restrikes. Traded in BU Condition.)
Bullion related gold coins in this issue are figured on a basis of gold at $341.25 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-60 (UNC BU AU EF) Strictly uncirculated coins showing any evidence of mint or post-mint handling (any evidence of rub or contact wherever no further qualifications are necessary) or the bag marked 'slide' except coins that may not have full luster.

MS-61 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. Should have full lustre. These are well above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins These usually average MS-63---but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

UNC TYPE COINS

Bid prices are for strictly graded coins. Commerical or borderline graded coins may bring substantially less.

11 POINT GRADING SCALE ACCEPTED BY ANA

MS-65 Dollars, Commems, & Type — Stable

The Market in Depth

This past weekend, the ANA Board of Governors met, debated, and unanimously accepted the 11 point grading scale---MS-60, 61, 62 . . . . 70. Originally intended to discuss the feasibility of the MS-64 grade, the ANA Governors showed their leadership in the hobby by going the whole route and accepting all eleven grades. They felt this was a necessary action for the future as well as today. MS-64 has been used for the last couple of years in the marketplace and eventually all in between grades will be followed. By accepting the new system, the ANA is looking to the future when grading can, at least in terminology, be standardized. There will probably always be debates over how a coin grades, but at least now, the industry will be talking the same language---numerals.

Not all of the in-between grades will be used immediately by ANACS for grading purposes. Each particular graded coin in a given series will necessarily have to be in the ANA Grading Set before that grade can be assigned to a coin by ANACS. For example, when ANA has an MS-64 Morgan dollar in the set, then ANACS will have a visual specimen by which to compare. This will be the case for all other series also. According to Rick Montgomery (ANACS Director), "This creates a new and exciting challenge for ANACS, one that should have been implemented sometime ago. Also, the grading sets will do wonders for visual standardization." By the way, the ANA is looking for donations of various graded coins to be used in assembling the grading sets (all series) to be located at the ANA museum.

Over the past several weeks it has become increasingly obvious that some of the nation's leading numismatic firms have seen a decrease in their volume of business. This being the case, what has happened with the activity in the corner coin store? Of course, every store is different by size, inventory, volume, location relative to masses, and desire to succeed. All things being equal, business in the local coin store is not off as much, percentagewise, as it is for many of the marketmakers.

As one dealer noted the other day, "small stores are still the backbone of this business. Big is OK, but where would they be without the small guys? Kind of like General Motors without all the small machine shops." This rings true, by comparison, as General Motors and the other major auto manufacturers get all the publicity, so do the major coin firms. This is generally because they do the majority of the advertising.

The major coin firms mail out thousands upon thousands of sophisticated advertising pieces. They advertise in newspapers and magazines enticing the buyer to purchase coins from the particular coin company. The local coin shop may advertise in the yellow pages or even in the local newspaper. But, he may not get the exposure the large investment houses do. So the wise local proprietor must take advantage of the industry advertising and show the inquisitive customer how his personal expertise can be as much or more advantageous than the big firm's. By doing so, the local coin shop will experience fewer peaks and valleys in their volume of business as compared to the large marketmakers. In the long run, a consistent incline in business is what we all strive for.

This Week's Market

CENTS: With few exceptions, BU Lincoln rolls were rather quiet this past week. Bidding took place at current levels for a handful of dates, while most were totally ignored. The good news is that discounted lots were very inconspicuous.

NICKELS: BU rolls of Jefferson nickels are seeing as little activity as Lincolns. There is very little interest among the usual buyers of Jefferson rolls. Unless someone decides to discount various dates, this may be a long quiet summer.

DIMES: Although plus signs can be found for the 1938-D & S Mercury rolls, most offers to buy are generally in the bid areas. When large lots of Mercs are located, it usually takes an amount in excess of ask to pry the rolls loose.

QUARTERS: After falling week after week, BU Washington quarters finally have reached a point of stability this week. There are no changes, but, will this be the turning point? The 1982-P & D rolls continue on want lists at current levels.

HALVES: The BU Franklin half dollar series is the one series which seems to falter week in and week out. Possibly because of the overall higher price levels per roll compared to other series or the giant gains they made as they rose in the past runup, Franklins are steadily retracing their steps downward.

DOLLARS: MS-64 and MS-65 dollars appear to be very firm at today's levels. With the slight adjustment for common dates the past couple weeks, some dealers were concerned that there would be a panic, but this has not materialized. There are several dealers, once again, buying any and all dates at current levels. A few buyers of MS-63 dollars have recently become more visible, also at current levels.

PROOF SETS and MINT SETS: The majority of proof sets have stabilized over the past week, in fact, most of the silver sets from 1950-63 are even stronger. Mint set buyers were at bid this week, and very few discounted sets were available.

COMMEMORATIVES: Bidders have come back out of the woodwork this past week attempting to buy any and all silver commems, in MS-63, 64, and 65, at current levels. The small corrections of last week were just that---corrections.

TYPE: The Proof and MS-65 type market looks solid at today's levels. The one drawback sellers are having is locating the bid buyers for the particular coins which they may have available. This is a problem that the seller may sometimes encounter; finding the highest buyers. After checking buy prices from 15 of the most active dealers across the country, we found only 2 bid buyers, while the rest were anywhere from 5% to 40% off bid.

GOLD: U.S. gold appears stable in most grades. The lone exceptions are Type II $1 and $3 in MS-60, 63, and 64. These bids have all adjusted downward as buyers are a considerable percentage back of bid. Since these issues were strongly marketed last year, it now seems that the marketmakers feel that they are overpriced.

FOREIGN GOLD: (Modern & Restrikes. Traded in BU Condition.)
Bullion related gold coins in this issue are figured on a basis of gold at $345.50 per ounce.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

Walking Liberty Half Dollar

The Ultimate S-Mint Walker

Limited Supply

$795

Price Subject to Change
Limit: One Per Customer

Two months ago, Heritage made a spectacular original roll purchase of 1945-S Walking Liberty Half Dollars. We carefully selected the nicest specimens from the group and sent them to the American Numismatic Association Certification Service for authentication and grading.

A small number of these exquisite coins earned a grade of MS 65/65 and these we are proud to offer at the above special price while they last. Compare our quality and value with that of others charging substantially higher premiums for recently certified coins – we're convinced you'll be delighted with your purchase.

When you buy your 1945-S Walker from Heritage, you'll get more than the beautiful, lustrous specimen we are currently offering:

- ***You'll also get*** an accompanying certificate of grade and authenticity from ANACS, dated May 1986.
- ***You'll also get*** Heritage's unconditional 45-day return privilege – if you decide to return the coin within 45 days, for any reason, your money wil be refunded instantly.

Remember, availability of this special offer is limited, so place your order today. Our standard 3-month layaway is also available for this purchase.

OUR GUARANTEE

All coins purchased from Heritage Rare Coins Galleries are covered by an unconditional 45 day return privilege, one of the longest in the industry.

It is guaranteed that all coins sold are genuine. As proof of our certainty that no counterfeit or altered coin can escape our attention, it is also guaranteed that we will refund the full Heritage purchase price plus 15% interest per year compounded annually on any non-authentic coin sold through Heritage Rare Coin Galleries. If you request auction for liquidation, Heritage Numismatic Auctions, Inc., after acceptance, will catalog your coins at the same grade which you purchased them.

Each and every coin sold by Heritage is graded on both the obverse and reverse, according to the grading standards practiced by the Numismatic Certification Institute (an affiliated company). It should be understood, however, that grading is an art and not a science, and opinions on grading and value can and often differ between experts as well as other grading services. The purchaser is therefore encouraged to carefully inspect and evaluate all coins during this 45 day period. This guarantee applies to all purchases after January 15, 1986.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63 -but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

UNC TYPE COINS

Bid prices are for strictly graded coins. Commerical or borderline graded coins may bring substantially less.

INVESTORS REQUIRE PRECISION GRADING

Collectors Know What They Like

The Market in Depth

Being that grading is the most controversial area of numismatics, it should be readily apparent that dealers (although, profits should be their primary goal) need to make education of their clients their number one priority. One cannot expect a novice to comprehend the intricacies of finite grading overnight or even in a couple of years. Even now, some dealers cannot distinguish between MS-63 and 64, or 61 and 62. But, for those dealers, finite grading may not be necessary.

For most collectors, the 11 point grading scale is not required because they have "paid their dues", they have studied coins over a period of time; they know what they want, how it should look, and how much they are likely to pay. Nevertheless, in order to satisfy the growing demand for standardization, where we might all speak the same language, the widespread acceptance of the 11 point grading scale is a step in the right direction. If we expect to continue to build and perpetuate this industry, we must show the clients how the majority of dealers grade coins the same. True, no two dealers will see the same coin, the same way. But, if the top two grading services (PCGS & ANACS) continue to be as widely accepted as they have been, and grading will remain consistently the same with no changes, then we will have overcome a rather important barrier.

With the majority of dealers and their clients now preferring to buy and sell "papered" coins, especially in MS-63 thru 65, comes a particular drawback. Many dealers will not buy higher grade (expensive) coins unless they have been papered, usually by either ANACS or PCGS. The client prefers the comfort of knowing more than one party graded a coin in a particular manner. So, to satisfy this demand, thousands of coins are being sent to ANACS, PCGS, NCI and other grading and certification services, thus, causing many thousands of coins to be temporarily off the market until they can be "papered" and returned.

ANACS and PCGS alone, have as many as 20,000-30,000 coins per month go through their service and if there is a two month backlog, there could be 60,000 coins tied up. Add to this the other grading services and one can readily see why business may appear to be slow in some areas, when in fact, there are many buyers for these properly graded coins. This may tend to limit supplies, thus, increasing prices. On the other hand, the end result may be some downward movement for the more common issues, in a particular grade, which may come on the market in large quantities sometime in the future. This is where the collector may be better off than the investor, as the collector is well aware of these possibilities in certain areas. The investor should follow the lead of the collector and learn why certain coins are rare before putting his money on the line.

This Week's Market

CENTS: Very little action was reported this past week for BU Lincoln rolls. What few dates were active were offers to buy 1944-S, 45-S, and 48-S, all at current levels.

NICKELS: BU Jefferson nickel rolls are seeing modest bidding at best. The only changes were seen for the 1938-S and 1950-D (both lower) at $110 and $190 bid, respectively. One would think that 1950-D's should be stable at $5 a coin, but such is not the case. Occasionally, rolls are offered between $190 and $200.

DIMES: The majority of bidding for BU Roosevelt dime rolls is taking place within current ranges. Activity is almost evenly split between the buying and selling side.

A nice original lot of Mercury dime rolls was offered this past week within the bid/ask range. The rolls offered were 1939-D, 41-D, 42-D, 43-D, and 45-P.

QUARTERS: Aside from the fact that pre-1955 BU Washington quarter rolls are stable at today's levels, a few specific later dates are lower due to discounted offers to sell. Those dates with lower bids are 1955-D, 58-P, 61-P, D, and 62-P.

HALVES: BU Franklin rolls are still being discounted on the sell side. From 1957 thru 1961, both P & D mints, fell this week. There is no visible support for these late dates, although earlier dates do not seem as readily available. The 1964 Kennedy rolls trade on a regular basis between $50-$53.

DOLLARS: Many dollar dealers seem to be taking it easy right now, so that the current marketmakers do not find competition too intense, therefore, bidding remains at current levels. Do not be mislead in thinking that the MS-65 dollar market is slow; it is not. It's just that supplies are meeting current demands. The same can be said for original dollar rolls at today's levels; there are not a lot of buyers, but they will currently pay at least bid.

PROOF SETS and MINT SETS: Proof sets from 1936 to 1960, are currently trading at bid to ask levels. However, 1961 to 63 sets are seeing large quantities offered at lower levels. Minus signs are found throughout mint sets from 1964 to date.

COMMEMORATIVES: Although changes cannot be found for silver commems, this series has strengthened up nicely. A few weeks ago, some issues in MS-65, were available at discounted levels, but since, are now trading strongly again. It takes but a few buyers to heat up this series rather quickly.

TYPE: Proof and MS-64 & 65 type coins are getting a lot of play by dealers who are recommending them to their clients, but, as of yet, we have not seen any movement upwards in bidding levels. It is probably just a matter of time before this occurs. Many dealers are touting how rare gem and near gem type is compared to other series,such as Morgan dollars, and that type should be worth many times what common MS-65 dollars are worth. We must admit, this is hard to argue with considering we have seen thousands of MS-65 dollars, while gem type is seen only in small quantities.

GOLD: MS-63 gold remains steady, while MS-64 & 65 coins are difficult to locate. One recurring conflict appears from time to time in specific grades. That is, when buyers and sellers are over and under current bid prices for a limited quantity of coins. This is the case now in the MS-60 column. For example, one dealer offers a little over bid for a limited number of MS-60 $2½ Liberties; another dealer will sell the same coins for a little off bid. Therefore, the problem is getting the buyers and sellers together.

FOREIGN GOLD: (Modern & Restrikes. Traded in BU Condition.)
Bullion related gold coins in this issue are figured on a basis of gold at $344.40 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark--these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices--particularly the pre-1941 issues. Washington rolls--dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-60 (VERY CHOICE UNCIRCULATED) Will be very sharply struck, with only a trace of wear on the highest points. Will have no marks or hairlines that are noticeable without magnification, but may have a few minor bag marks and/or abrasions. May not have full luster.

MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. Should have full lustre. These are well above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

IS IT TIME FOR A NEW RARE COIN INVESTMENT STRATEGY?

Dear Grey Sheet Readers:

How would you like to turn $10,000 into $50,000-$100,000 in 3 years?

While most rare coin advisors are still recommending Morgan Dollars, Walkers and Commems, we say there is truly a once-in-a-lifetime opportunity in Gem U.S. Gold. The kind of opportunity that existed when Silver Dollars were $15, not $500-$1,000.

"AMAZING GOLD RARITIES" - A $30 MILLION INVESTMENT PROGRAM

A few months ago, we started an experimental investment program for contrary investors who believed in the future of Gem Quality MS-65 coins, but who felt that 1881-S Morgans, 1941 Walkers and 1938-D Buffalo Nickels really aren't the way to go. We named this program "Amazing Gold Rarities" and vowed to put together a collection of 500 of the absolute finest U.S. Gold Coins in existence, strictly MS-65 to 67 Unc and Proof material --- to be sold in a gigantic $30 Million auction in 1989. The auction will probably be conducted by a major U.S. firm like Stack's or Paramount in connection with a major art auction house like Sotheby's.

The theory is to take the most underpriced rarities (always in Gem), turn them into the greatest collection since Louis Eliasberg's Gold Coins brought $12.4 Million in 1982 and sell them to the wealthiest people in the world. People who are used to paying $100,000 to $1 Million for art and antiques, not just coin collectors.

In only four months, over 70 investors like you have purchased well in excess of $1 Million worth of incredible Gold Coins including Amon Carter's Cameo Proof-67 "Finest Known" $4 Stella for $80,000, an original 1896 Cameo Gold Proof Set, an MS-65 1824 Half Eagle, four MS-65+ $3 Gold Pieces and 50 other near-perfect Gem Gold Pieces!

Did you know that of less than 30,000 U.S. Gold Coins struck in Proof (the total original mintage) fewer than 1,500 Gems or near-Gems still exist? Yet these coins can currently be purchased for as low as $15,000 - only 15 times the price many people are paying for common-date MS-65 Morgan Dollars!

WOULD YOU LIKE TO KNOW HOW TO PARTICIPATE?

Right now, it is possible to sell your common Gem coins for record prices. Many dealers guarantee to pay full Grey Sheet 65 Bid for their own Gem coins. You can use these coins in a like-for-like trade for Amazing Gold Rarities and thus turn your successful "old" investment strategy into a successful "new" one. Or you can trade unprofitable material for something with true potential. Or you can pay cash. Whatever your situation, it will pay you to contact me immediately to find out more about the A.G.R. Program and how it might make you 500%-1,000% profit in 3 years.

Think about it. Wayne Millers 1878-S Morgan $1 realized $37,000 at auction. Why not invest $10,000 in a Super-Gem Gold Coin?

P.S. We handle PCGS and non-PCGS coins.

Long Waiting Periods- You will probably have to wait 6 to 10 weeks for your coins.

A Deposit for Them- Your coin deposit earns interest in their pockets, not yours.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the sema characteristics as the MS-65—but with the additional feature of deep mirror prooflike surfaces both sides.

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck—and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to data.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63 - -but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

UNC TYPE COINS

Bid prices are for strictly graded coins. Commerical or borderline graded coins may bring substantially less.

MARKET LACKS MATERIAL, NOT BUYERS

BU Rolls - Dimes, Quarters, Halves - Searching For Bottom

The Market in Depth

It is never easy to predict, "when is the best time to buy coins which have been in a down-market?" However, the main consideration might be, if the market has fallen substantially over an extended period of time, thus, leading one to believe that the market bottom is near, then one could be satisfied knowing that they had not purchased coins at the top of the market and had saved the difference in the high prices as compared to the current lower prices. For example, on January 3, 1986, 1955-P Roosevelt dimes were bid at $100 per BU roll. On July 18, 1986, they are bid at $87, a potential 13% discount. There are many other such examples within the Roosevelt series, as there are in the Washington and Franklin series. The following charts will show the potential savings over this period of time for selected issues, as listed under "% Reduction".

Roosevelt Dimes	Jan. 3, 1986	July 18, 1986	% Reduction
1946-S	$175	$135	23
1948-P	$340	$290	15
1948-D	$260	$220	15
1953-S	$ 75	$ 60	20
1954-S	$ 73	$ 54	26
Washington Quarters	**Jan. 3, 1986**	**July 18, 1986**	**% Reduction**
1946-S	$275	$230	16
1947-S	$295	$245	17
1949-D	$335	$280	16
1954-P	$112	$ 85	24
1954-D	$105	$ 72	31
1954-S	$155	$125	19
1955-D	$215	$150	30
1958-P	$152	$110	28
1958-D	$110	$ 67	39
Franklin Halves	**Jan. 3, 1986**	**July 18, 1986**	**% Reduction**
1948-D	$ 325	$260	20
1949-P	$1100	$925	16
1950-P	$ 850	$725	15
1952-D	$ 260	$210	19
1953-D	$ 295	$205	31
1954-P	$ 225	$175	22
1954-D	$ 190	$150	21
1954-S	$ 360	$280	22
1955-P	$ 385	$295	23
1956-P	$ 275	$190	31

The balance of this series also had a dramatic downturn. We are not about to say now is the time to buy, just that, the BU roll market does run in cycles. We know that we are not at the top of a cycle, and the market has come down substantially, so we must be somewhere between the middle (on the way down) and the bottom of the market.

If one were to select a particular year that might be used as a barometer of the BU roll market, it would be 1955. This year (P, D, & S) has always been a leading indicator of which way the market has been headed. It has been this way since 1955 and seems to have lead the direction of the various cycles ever since.

This Week's Market

CENTS: BU Lincoln rolls have turned toward the quietside the past few weeks. Except for a few specific dates, most are totally neglected at today's levels. The only way some dates will sell is if they are offered at large discounts. And the only way sellers will offer large discounts is if the majority of the rolls are inferior in some manner.

NICKELS: BU Jefferson nickel rolls are beginning to show renewed signs of weakness. Aside from the non-participation of most dealers in this series, one will occasionally find various dates going unsold at discounted levels. This week finds bid levels changed for 1945-P, 47-S, and 54-S, all to the downside.

DIMES: Original Mercury dime rolls continue to be active at bid/ask levels. However, some Roosevelt dime rolls are once again, showing weakness. The 1946-S roll is now bid $135, yet, some dealers believe this is a very difficult date. We don't disagree, but there are other dealers who continue to come up with rolls at discounted levels. Also moving lower on the charts are 1953-D, S, 57-P, and 59-P. There were a couple rolls bid higher, 1950-P and 57-D.

QUARTERS: BU Washington quarters seemed to stabilize the past couple of weeks. Apparently, this was a false indication as several dates have fallen this week. Rolls after 1953 seem to be available at under bid levels, or no higher than bid.

HALVES: Except for a couple minor adjustments, the majority of original W.L. half dollar rolls remain saleable at current levels. And, although early Franklins do not carry any minus signs, the more common issues are blotted with them. Most dates from 1955 to 1961 have fallen while support retreats to earlier, lower levels.

DOLLARS: MS-60 Carson City dollars have found sellers to be plentiful at lower levels, while buyers seem to have lowered their bids. Most dealers seem to be active in one of the following grades: MS-63, MS-64, or MS-65. These appear to be stable at current levels with supply almost satisfying demand. This slight imbalance of demand over supply keeps wantlists active.

PROOF SETS and MINT SETS: Early Franklin proof sets (1950-54) have fallen slightly as the last support has retreated somewhat, and sellers appear at bid or less. The 1958-60 sets are also lower.

COMMEMORATIVES: Despite the overall strength of MS-65 silver commems, one will find several issues with minus signs this week. This is not a sign of weakness, it is just a matter of some of the easier-to-locate issues adjusting.

The Olympic and Statue of Liberty Coinage have tightened up their spreads between bid and ask considerably and gained a little strength.

TYPE: By viewing the type charts one would think that the 63-65 market is semi-quiet. Such is not the case. The few minus signs that appear have firmed up those particular issues. The plus signs indicate active buyers at higher levels and the issues with no changes are generally solid. PCGS coins are in strong demand above today's levels for most issues.

GOLD: Occasionally, some better date U.S. gold coins are offered for sale at prices relative to their rarity. Since this information is not often available, we felt it would be beneficial to relate some actual offers to sell: 1852-C $1, AU-55, $900; 1849-D $2½, XF-45, $600; 1841-D $5, XF-40, $700; 1842-C $5 (large date), XF-45, $700; 1879 $4 Stella F.H., XF-40, $19,750.

FOREIGN GOLD: (Modern & Restrikes. Traded in BU Condition.)
Bullion related gold coins in this issue are figured on a basis of gold at $345.50 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

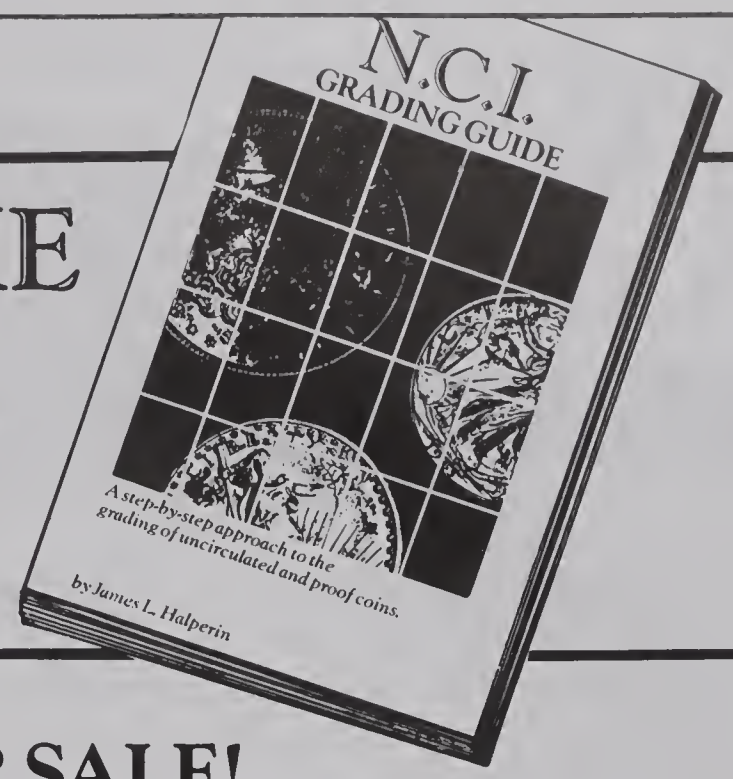
MS-60 (CHOICE UNCIRCULATED) Will have many bag marks and/or scratches, and/or hairlines, and/or contact marks on the high points of the design. Will have average to above average luster for the issue. Will be well struck and well centered. Will be free of distracting spots or stains.



MS-63 (CHOICE UNCIRCULATED) Will have minor bag marks, may show only a slight weakness of strike. Should have full luster. These are well above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63, but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63--but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

UNC TYPE COINS

Bid prices are for strictly graded coins. Commerical or borderline graded coins may bring substantially less.

The Market in Depth

It is truly amazing how each year the "Apostrophe Auctions", this year being Auction '86, can come up with as many true rarities as the four major participating coin companies do. The four coin companies are Stack's Rare Coins, Rare Coin Co. of America, Inc., Superior Stamp & Coin Co., Inc., and Paramount Numismatic Services, Inc. Bear in mind, that the annual ANA Convention is but a couple of short weeks away. We feel that after this show the direction of this market will be emphatically clear. The Milwaukee ANA begins August 6th and runs through August 10th. PNG Day precedes ANA on August 5th.

This Week's Market

CENTS: It appears that BU Lincoln rolls will have to see some fervent action in many other series before they would actually see any serious activity on the plus side. This week finds the 1937-D & 39-D at lower levels. Although, there were several other dates wanted at bid for limited quantities.

NICKELS: This week's columns for BU nickel rolls (Buffalo and Jefferson) have hardly changed. Trading is minimal in the Jefferson series, while buyers and sellers usually get together on original Buffalo rolls.

DIMES: Discounted selling of BU Roosevelt dime rolls has not ceased, especially for rolls dated 1953 and later. These later dates seem to be testing new lows each week.

QUARTERS: Last week's long run of minus signs for BU Washington quarters is followed by a few more declines, some of the same dates. This continued weakness has to be somewhat attributed to an overall summer slowdown within the coin business.

HALVES: BU Franklin rolls have taken a week off from all the recent minus signs. Only time will tell whether this series is about to firm up or continue to search for lower levels.

The 1976-S, 40% silver, BU roll was wanted at the ask level in interweek trading, but the buyer was quickly filled.

DOLLARS: It should come as no surprise that several MS-64 and 65 dollars have fallen this week. After carefully studying this series over the last couple of weeks it is apparent that the bidders of this series are buying only certified coins at their high buys. "Unpapered" coins are bringing quite a bit less, thus, many bids are lower. Keep in mind, this market does not appear weak, it's just that buyers are a little conservative at this time. Nevertheless, some dealers will pay premium prices above their normal bids for papered coins if the coins are of select quality.

PROOF SETS and MINT SETS: Trading in these two areas is minimal at best. Changes are limited to but a handful on each chart.

COMMEMORATIVES: MS-64 and 65 silver commems have adjusted somewhat. Buyers have lowered their bids and sellers try to find the highest buys. In some cases, sellers are offering coins from ask to bid and in a few cases, even under bid. As with dollars, some papered coins may bring higher buys, but only for selected issues. This market remains very much in demand, but, only at these new lower levels.

TYPE: There are a whole flurry of plus signs for MS-64 type coins. Some dealers feel the gap between MS-64 and 65 is too wide for the closeness in quality between the two. If this is the case, one can look for this gap to narrow. Nonetheless, the buyers of MS-65 type are beginning to push their bids higher for specific coins.

GOLD: MS-63 and better U.S. gold appears quite strong at the moment. But, like most series, the higher the grade, the less plentiful the coins. Profit-taking does not seem on the horizon for MS-64 and 65 gold.

FOREIGN GOLD: (Modern & Restrikes. Traded in BU Condition.)
Bullion related gold coins in this issue are figured on a basis of gold at $354.50 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-60 (CHOICE UNCIRCULATED) Will have minimal bag marks, may show only a slight unevenness of strike. Should have full rims. These are the above average coins.

MS-63 (CHOICE UNCIRC. (LATED)) Will have minimal bag marks, may show only a slight unevenness of strike. Should have full rims. These are the above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

$2,000,000

"Ikes"

The most overlooked series in Numismatics today
The most undervalued series in Numismatics today
The most underrated series in Numismatics today

Books will be shipped the end of September 1986 (tentatively)

Did you know that all the Uncirculated Eisenhower dollars come in Proof-like condition, the catch is they are 100 times rarer than 4 million Morgan dollars in Prooflike condition. Prooflike Ike dollars sell for a mere fraction, or less than 10%, of Morgan P.L. silver dollars.

90% of dealers know nothing about Ike dollars

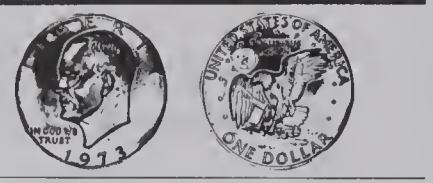
Eisenhower Dollars are the last series that offer 100% to 400% upside increases in the next 2 to 4 years and more. Nothing in Numismatics today offers a better upside potential!

Eisenhower MS-65 silver dollars were sold for $4.00 in 1976 and MS-65 Morgan and Peace silver dollars were selling at the same time for $8.00, only a 2 to 1 ratio. Today MS-65 Morgan and Peace dollars are selling for over $800.00 for just common dates while Ike silver dollars are selling for around $35.00 for common dates. That is a 23 to 1 ratio.

There are over 4.3 million Morgan and Peace dollars in MS-65 grade. There are only 579,000 Eisenhower silver dollars in MS-65
MS-65 Ike silver dollars are 7.8 times rarer than MS-65 Morgan and Peace silver dollars and only sell for less than 4% of a Morgan or Peace dollar

Over 3 years were spent to produce this massive work on Ike dollars. The book breaks down Eisenhower dollars into Strike, Lustre and the amount of Bagmarks per side to ascertain grade.

About The Author



Mr Hager has sold well over $110 million worth of coins in the last 25 years, and is an author, teacher, lecturer and is considered an expert in his field. Mr. Hager, 37 years old, who wrote the number 1 and number 2 selling silver dollar books in 1985 and 1986, sold over 14,000 books worth $850,000.00, hopes to do it again in 1987 with the Ike book. Mr. Hager started collecting in 1959 by going through 10 to 15 bags of Morgan and Peace dollars per weekend from 1959 to 1964. Mr. Hager has viewed well over 3 million silver dollars as well as over 250,000 Ike dollars from 1980 to present.

Mr. Hager has been asked to speak and lecture on grading at over 20 major coin shows per year He has written, to date, the largest and most comprehensive silver dollar books, over 1550 pages, in the last 3 years. It would cost over $100 million dollars to duplicate what Mr. Hager has acquired and written to date.

Pre-publication price is only $35.00 till August 31, 1986

RECOMMENDATIONS

Collector: Highly Recommended but due to the extreme rarity of grade an MS-63 or MS-64 must be considered. The price will also be considerebly less.

Advanced Collector: My Highest Recommendation. This grade will prove to be one of the hardest P L. to acquire. A premium is due for this true rarity, get an Ike specialist to help

Investor: I think you will be wasting a lot of time trying to acquire this grade. The potential is much better in the lower grades and a little easier to find

Date History: The 1973-S Prooflike is extremely rare and the chances of locating one are even rarer. I would advise getting some professional help to locate one. A large premium is due on this grade, choose the A2 if at all possible

This Author has bought and handled over 8 pieces in this date-grade since 1980

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63 -but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

UNC TYPE COINS

Bid prices are for strictly graded coins. Commerical or borderline graded coins may bring substantially less.

Vol. XXIV No. 31 | August 1, 1986 | Single copy price: $3.50

TYPE BUYERS VERY SELECTIVE
Auction Results Mixed

The Market in Depth

This past week, Auction '86 produced results which could and should have been anticipated. Nice coins brought good money, off-quality coins realized disappointing numbers, and better date rare coins, in general, did not bring prices commensurate with their rarity, while gem coins (those not considered better dates) realized values proportionate to their quality in relation to bid levels. In other words, collector coins are still not getting the results one would expect in comparison to the so-called common coins in gem quality. Many numismatists are touting rare date coinage, with good reason, but, as of yet, the market is not demanding these better dates at higher levels. As long as the better date coins are available and interest is subdued, demand will not persist at higher levels. The following prices realized were some of the highlights from Auction '86. Grades are those of the individual cataloguers.

This Week's Market

CENTS: This week's activity was limited to but a few specific dates. The 1948-S roll was wanted at higher bids, as were 1949-S, 52-P, and 71-P (wanted in bag quantities), but, the 1943-P was discounted to $16. The 1960-P sm. date is very active at current bid.

NICKELS: BU wartime nickel rolls are softening considerably. The usual bidders are temporarily out of the market, thus resulting in lower bids for the 1943-D, 45-P & S rolls. Also following this trend are 1950-D and 54-S.

DIMES: BU Roosevelt dime rolls run from slightly ignored to somewhat lower. Although changes are minimal, it is difficult to find active bidders at current levels. The 1955-S roll is available in large quantities at lower levels.

QUARTERS: BU Washington quarter rolls remain sluggish with a few dates offered at discounted prices. The 1947-D, 54-D, 61-P, D, 62-P, & D have all fallen this week.

HALVES: The slumping BU Franklin series does not show any signs of letting up. Every week more minus signs appear and even the bidders are very careful that their buys aren't too close to the current bids. This market is quite thin at this time.

DOLLARS: The most common MS-65 Morgan dollars continue to find sellers at lower prices. The highest bidders are considerably behind bid levels. Still, the majority of competitive bidders are looking for recently graded ANACS or PCGS certified coins at their buy prices. On the other hand, the majority of rare dates are in demand at current bids or higher.

PROOF SETS and MINT SETS: The 1961-63 proof sets are receiving some renewed activity at higher levels. The same cannot be said for the 1979-S, 80-S, and 81-S proof sets.

Large quantities of 1974-1977 mint sets are in demand at a higher $4.25 bid. But, 1965-69 and the 1976-S 3 pc. (40%) sets are offered at lower bids.

COMMEMORATIVES: After last week's minus signs for a variety of MS-65 silver commems, this week's bids (except Bay Bridge lower at $925 bid) all seem to be rather firm. Most offers to sell are usually at the ask levels. There is some weakness for selected issues of MS-64 quality, but this is very minor.

TYPE: Although type coins continue to threaten higher levels, the active bidders remain at or just a little under current bids. This is the case for proof and mint state 64 and 65 coins. In Auction '86 Barber coinage seemed to reflect a slight loosening of grading. Nevertheless, the majority of type coins need to be very eye-appealing to the buyer in order to command bid levels.

GOLD: Generally speaking, MS-63 and better gold is in demand and not readily available at today's levels. But, in order to command these prices, coins should be strictly graded for each particular grade. Three dollar gold pieces are adjusting downward in MS-60 and 63.

FOREIGN GOLD: (Modern & Restrikes. Traded in BU Condition.)
Bullion related gold coins in this issue are figured on a basis of gold at $354.25 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-60 (CHOICE UNCIRCULATED) Will have average bag marks, may show only a slight weakness of strike. Should have full mint lustre and are well above average coins.

MS-63 will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-61. Must have eye appeal.

MS-64 will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit visually clean appearing face and breast feathers. MS-64's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit visually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same chereteristics es the MS-65---but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck ---and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63 --but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

UNC TYPE COINS

Bid prices are for strictly graded coins. Commerical or borderline graded coins may bring substantially less.

ATTITUDES MIXED GOING INTO ANA

PNG Day Opens Active With Large Attendance

The Market in Depth

The American Numismatic Association Convention, in Milwaukee, this week, is coming at a most opportune time. It is needed right now because business is relatively slow, and there is a lot of negative feelings among many dealers throughout the industry. It seems that some so-called expert coin dealers are trying to undermine the business by continually back-biting any and all other dealers. This negative type of publicity will not help our industry and is a definite detriment to the volume of business being transacted. There is no way to measure how much effect this negativity has on the business itself, but many dealers say they feel the crunch.

While ANA officials expect a large attendance, more importantly, dealers and collectors will have a chance to get together at the year's largest show for the hobbyist. With all the events scheduled in a short amount of time, it will keep the coin enthusiast quite busy throughout the week. This convention will not only give the collector a chance to view the coins of almost every major dealer in the country, it will give us an opportunity to more closely determine what the buyers and sellers are actually doing. If one is to be considered an active marketmaker, it would be impossible to miss the show "that brings the market together". Moreover, since all shows are different depending on which dealers attend, show attendance, attitudes, and want lists, this one will be a bellwether show for the rest of the year.

Speaking of collectors, much has been written lately of the collector being dissatisfied with numismatics. They are supposedly unhappy with high values and are quickly dropping out of coin collecting. I don't believe this is the case. While talking with many dealers, it is apparent that much of their sales of better-dated coins are to collectors. Yes, they are fussy. But that's because they know what they want and know approximately what they will pay. Can you show me a collector who is unhappy about his coins going up? I don't think so. But, this is the source of some dissatisfaction, voiced, I believe, more by investors who don't know how to grade. When they go to sell their coins they find grading a little tougher and the coins they had heard had increased in value, actually had not. This has been the case since 1979-'80, but hopefully, grading is at a consistent level in 1986, and will remain so from now on. As a majority of dealers do try to do business in a fair manner, it is too bad that some dealers can spoil "the soup". If we all work together to rid ourselves of the negative aspects of the industry, we will all be better off for it.

Editor's Note:

All numismatists (including investors) should realize that the rare coin industry, especially in top quality coins, is a highly specialized business in itself. It is a different and separate entity when seen through the eyes of the hobbyist. Moreover, the specialization and exactitude in grading is what differentiates the investor market from the hobby. Descriptive grading, i.e., adjectives---Gem, Choice, Flashy, etc., may be tolerable for the hobbyist, but the exactness of numbers is necessary for precise pricing. Although wide price ranges may be acceptable for the hobbyist (the collector can look at a coin and know if the price is right), the investor needs the benefit of exact grading and pricing in order to even consider coins as an investment. Better yet,the investor should take a lesson from the collector.

This Week's Market

CENTS: This week finds the BU 1943-P, D, & S rolls, all lower, as sellers of these dates discount them. The rest of the Lincoln series is relatively quiet with the exception of the 1955-S and 71-P rolls, both higher. Also higher is the 1986-S proof roll at $275 bid.

NICKELS: The Jefferson series is mixed. Several war nickel rolls are lower (1944-P, S, 45-P, & D), while some early rolls in the '40's are higher. Those higher are the 1940-D, S, 41-D, & S, all bid at $65 per roll.

DIMES: Original Mercury dime rolls are active at current levels, but several of the late-dates are lower in MS-65 FB condition, found in this week's Monthly Summary.

After last week's lack of activity in the Roosevelt series, this week has scattered minus signs, once again. Most issues from 1955 to 1963 have fallen as interest continues to wane.

QUARTERS: Talking about BU silver rolls is almost like a broken record. Most dates in the Washington series are lower from 1956 thru 1963. The most activity is found for original BU bags of 1982-P & D's, wanted at $2700 and $2500, respectively.

HALVES: Gem BU Walking Liberty halves have suffered a minor setback as seen in the Monthly Summary (1941-1947). Also showing continued weakness are some of the later date rolls in the Franklin series (1959-63). In contrast, some Kennedy rolls are very active with the 1983-D, 84-P & D's at higher bids.

DOLLARS: Many dealers are watching as their inventories of MS-64 and MS-65, common date dollars continue to fall. This is obviously having an effect on the investor who has bought at much higher levels and now is obliged to wait until buyers and bid levels equalize. Again this week, the highest buyers of MS-64 & 65 common date dollars require certified coins at their buy prices. Even a few MS-65 Peace dollars are lower.

PROOF SETS and MINT SETS: Silver proof sets seem to be stable, but many of the clad sets have fallen. All of the silver mint sets, from 1959 to 1964, have lower bids as dealers discount these dates.

COMMEMORATIVES: For the most part, the silver commem market is relatively stable at current levels, in all grades. The majority of dealers are buyers at 10% to 5% off of bid, but sellers remain at ask levels. There are a few exceptions to the downside, in MS-64, mostly in the Texas issues.

TYPE: Although touted by many dealers as extremely active, type coins, in PR-64 & 65 and MS-64 & 65 remain constant at current levels. Bidders have not yet advanced their buy prices, except for a minimal amount of select quality coins. Some dealers feel they can still buy many coins a little off bid, even though others will pay bid. Grading, still is subjective and what may be '65' to one, may not be '65' to another.

GOLD: Even though the price of gold bullion keeps inching upward, certain MS-60 issues continue to decline. This is a direct result of the mass marketing that took place last year. Since the high levels, the majority of dealers have been bearish for this quality of coin.

FOREIGN GOLD: (Modern & Restrikes. Traded in BU Condition.)
Bullion related gold coins in this issue are figured on a basis of gold at $360.00 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-60 (UNCIRCULATED) Will be very attractive, but bag marks, may show only a slight weakness of strike. Should have full luster. Toning may be present, but must be attractive. Must be well above average coins.

MS-63 (UNCIRCULATED) Will be sharply struck and have full luster (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

3. U.S. & CALIFORNIA GOLD

Gillio specializes in California Territorial Gold and Fractional Gold. We published the standard reference book "California Pioneer Fractional Gold" by Walter Breen and Ron Gillio. We buy and sell rare date/mintmark U.S. gold coins as well as maintaining a daily market in U.S. Type Gold.

We are direct importers from European sources so we can offer very competitive prices.

4. AUCTION SERVICES

Our sister company, Pacific Coast Auction Galleries, conducts three major sales each year in association with important shows—Northern California Numismatic Association ("Jack Tar"), Long Beach Numismatic and Philatelic Expo, and the Arizona State Invitational. We pioneered separate sessions devoted exclusively to the popular P.C.G.S. U.S. coins. Whether considering buying or selling it will pay to consider our auction services.

AUTHORIZED DEALER

ROBERT STEELE MADE A FORTUNE FROM SCRAP GOLD AND DIAMONDS

SO CAN YOU!

Steele shows you how in *The Scrap Dealer's Handbook*, the new blockbuster that reveals the inside secrets of the incredibly lucrative gold, silver and diamond liquidation business.

FACT: 25% of available gold and silver comes from recycling jewelry, coins, etc. The public is still selling.

FACT: Diamonds are easy to buy and sell. There is a well-established market for those in the know.

FACT: Since 1981, nine out of ten scrap dealers have quit the business. There is currently little competition.

FACT: You can make from 10% to 100% per **month** on your money in scrap and diamonds.

FACT: You can start in the scrap business with as little as $200.

PREDICTION: Inflation is returning. When it arrives, those established in the scrap business will reap incredible windfall profits — just like last time. Fortunes will be made overnight.

If you are a coin dealer, pawnbroker, investor, survivalist, or just a good old entrepreneur, you need this book. Let me tell you why. It gives you the "street knowledge" that you need to avoid getting burned when buying gold, silver and diamonds. That's the name of the game because selling scrap and diamonds is easy and instantly profitable. The big risk is in buying. So even if you are not a dealer, this book is indispensible. Get smart in gold, silver and diamonds, and you can buy with confidence. Not only that, you can buy these items way below wholesale cost and make a killing on resale.

CHECK OUT THE CONTENTS OF THIS INCREDIBLE NEW BOOK!

Chapter 1 — Basics: Tools and Weights

The tools needed to authenticate gold, silver and diamonds are readily available and cheap. Learn where to buy them, which brand names are best, and how to use them. The weights and measures used in the industry are completely discussed, and handy reference charts are included.

Chapters 2, 3, and 4 — Gold, Silver and Platinum

These chapters contain specific instructions on how to answer the following questions for any article made from precious metals:

1. Is the article really gold, silver or platinum?
2. How much gold, silver or platinum does the article contain?
3. What is the **real** current value of the article?
4. How much should you pay for the article?
5. How much can you sell it for?

Chapter 5 — Diamonds

The diamond industry intentionally markets diamonds as a mystical and magic gemstone in order to dupe the public. Learn the raw facts about diamonds! They trade at well-established, bottom-line values, for those with the right inside knowledge. This chapter gives you that knowledge. It teaches you how to grade diamonds, identify all fakes with foolproof tests, buy diamonds way below wholesale cost, and much, much more.

Chapter 6 — Finding Scrap

After being in the business for over 30 years, Robert Steele has identified the most effective ways of locating sources of cheap gold, silver and diamonds. He tells you how and where to make the most of your advertising dollar. In addition, he tells you what not to waste your money on — like T.V. and radio ads. Store location, methods of negotiation, setting up weekend buying campaigns, and much more are covered in this chapter.

Chapter 7 — Selling Scrap and Diamonds

This chapter focuses on how to make the most of what you buy. It explains how to balance your time and resources in order to maximize your profits. You will learn about the "scale of liquidity" which helps you decide at what level you should sell your goods — that is, should you liquidate your goods for a quick, small profit, or sell them at a retail level and really make a killing? This all depends on what you have to sell and how much time you have. It's all covered in this fabulous chapter.

Appendix — Lists of Business Contacts

The appendix to this book provides you with lists of suppliers, book stores, national precious metals buyers, major refineries, and nation-wide diamond buyers. These contacts are essential to the success of the scrap dealer and will significantly improve your business, even if you have been in business for a long time. Only well-established buyers are listed. One thing you **don't** need are fly-by-night operators that pop up frequently in the scrap business.

NOW FOR THE GOOD NEWS

The Scrap Dealer's Handbook only costs $19.95 including postage and handling. Duncan Publishing specializes in financial self-help books, and a book of this magnitude normally costs much more. Business startup manuals usually run over $75. By any measure, this is a terrific bargain. We are pleased to offer it to you. And with our money-back guarantee, you can't go wrong.

MS 65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS 65--but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS 67 PROOFLIKE (SUPER8) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for 'typical' coins. These usually average MS 63--but may also include some MS 60 and MS 65 examples. For strictly graded MS 65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark

MARKET SEARCHES FOR BOTTOM AT ANA

Sparks New Round of Buying at Lower Levels

The Market in Depth

Those dealers looking for the silver lining in a dark cloud of attitudes, can be thankful that they traded coins in large numbers at last week's ANA, in Milwaukee. Generally speaking, prices were not at all time highs, in fact, most series were trading at considerably lower levels. Moreover, some dealers talked about the market reaching a recent bottom. This may or may not be the case, but, the fact remains many dealers did not sit back and complain (many dealers still complain about lower prices), they went out there and worked. And many worked hard. There was a definite two-way market.

At past coins shows, where price levels were noticeably lower, many dealers would fuss about their losses and try to hold their inventory until the market came back. In the meantime, prices went lower in most cases and instead of taking minor losses they might take larger losses over a three or four month period. This show seemed to push dealers to the fastest reaction time ever in lowering their sells and continuing to participate, in what, on the surface, appears to be a depressing market. But, in truth, if we are in or near a market bottom, this might be a particularly opportune time to buy coins at levels some 30% lower than a few short months ago.

The hidden theme of the ANA Convention, for the dealers, seemed to be the trading of certified coins. Nevertheless, most trading of dollars, commems, Walking Liberty halves, in MS-65, was done at discounted levels. And, of course, the subject of parallel grading among the grading services was brought up many times. The conclusion drawn is that many of the services will try to form a national organization which will attempt to alleviate grading inconsistencies between services.

> Editor's Note: In light of the fact that many dealers and groups are trying to solve the grading problems, the CDN was witness to one such attempt. The PCGS has now graded over 100,000 coins in the first six months of its existence. It is quite understandable that any service that grades as many as 20,000 coins per month could make a few mistakes. We saw a PCGS principal re-purchase several dozen possibly overgraded coins (approximately $50,000 worth) from several PCGS dealers. To our knowledge, this is the first time any of the grading services have put their money on the line as a form of quality control and we would like to see more of it.

This Week's Market

CENTS: Activity was very light in the Lincoln series. This was due to the fact that most dealers of this material were at the ANA where their efforts were concentrated elsewhere.

NICKELS: The same might be said for BU Jefferson rolls except that the 1940-D, S, 41-D, and S rolls are higher, now at $70 bid. These dates are seemingly difficult to locate at this time.

DIMES: BU Roosevelt dimes suffered nominal changes to the 1949-P and D rolls, but the rest of the series was unchanged. There continues to be a lack of bidders for this series.

QUARTERS: The BU Washington series followed the suit of the other previously mentioned series as very little trading was done this past week. The only noticeable change was 1954-D, lower at $63 bid.

HALVES: Original rolls of Walking Liberty halves appeared to be somewhat sluggish at the ANA. We found various rolls in several showcases that remained unsold at discounted prices. Most rolls were 1941-45 'P' mints. And, although gem Walkers were relatively lower, many dealers were taking advantage of these levels to stock up.

BU Franklin rolls were stable with light trading this past week. The 1958-P and 60-P rolls are higher at $170 and $125 bid, respectively.

DOLLARS: Although minus signs are scattered throughout the MS-64 and 65 columns for Morgan dollars, a closer look reveals that the minus signs appear for the more common dates. In contrast, several rare or better date dollars are on want lists at higher levels. Obviously, as rare dates indicate, buyers are not going to find many in these elusive grades.

The thrust of the minus signs resulted from many dealers becoming sellers of the most common 'S' mints in MS-64 & 65. There were large quantities available on the bourse floors at both Milwaukee shows. The good news is there was very strong support at today's new lower levels. After the majority of dealers adjusted their buy prices, many of them began pounding the bourse floor buying and selling at these new levels; many dealers verified that they actually made good profits after this price adjusting took place.

A proof 66 PCGS 1895 dollar brought over $40,000. At the recent McIntire Auction a gem roll of 1881-S P/L dollars sold, on the floor, at $9350.

PROOF SETS and MINT SETS: Proof sets are stable at current levels and 1956-64 sets have seen a number of new buyers at bid levels. Mint sets suffered from a lack of activity this past week and remained unchanged.

COMMEMORATIVES: Silver commems realized their biggest number of minus signs in a long time (MS-64 & 65). Generally speaking, the issues which were struck consistently stronger are the ones lower. Several dealers had rather large inventories of commems for sale at ANA, in the 10%-15% off bid range. On the other hand, a number of more difficult to locate issues were wanted at higher levels, with very few if any found. Do not be misled by the number of minus signs because this series is still very actively sought, only at lower levels.

TYPE: Type coins are very active. But, prices are mixed. The plus signs for proof and MS-64 & 65 are an indication that dealers are trying to buy coins they feel are undervalued, while the minus signs relate to coins in inventory that do not seem to bring bid levels. Trading is as mixed as opinions. Although a few dealers feel type is hot, many others, who grade just as strictly, feel that coins they need can still be bought a little off of bid. Proof 64 & 65 type coins are the most active, since mintage is generally far less than mint state coins.

GOLD: Plus signs are scattered throughout the gold columns. Obviously, the big upswing in gold bullion has given many dealers a lot of confidence so they have raised their bids for VF thru AU material. However, the plus signs for the MS-64 & 65 coins appear to be a true indication of their availability.

FOREIGN GOLD: (Modern & Restrikes. Traded in BU Condition.)
Bullion related gold coins in this issue are figured on a basis of gold at $389.25 per ounce.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-63 (SELECT UNCIRCULATED) Will be free of bag marks only a weakness of the strike should have full luster and a well above average appearance.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

KURT R. KRUEGER NUMISMATIC AUCTION CORPORATION

In some numismatic auction companies, names are everything.

With Kurt R. Krueger and Martin B. Paul, the names are just the beginning.

Kurt Krueger

It's one thing for a numismatic auction company to attain wide name recognition.

It's altogether another thing for a numismatic auction company to live up to its name.

Kurt Krueger and Martin Paul rigidly adhere to philosophy number two. That is why they have created a formal association. Some points to consider:

Martin Paul

Kurt R. Krueger is a highly regarded "collectors' dealer" and has followed his numismatic pursuit since 1956. His reputation for "getting the job done" has brought numerous awards and many elective offices, including the Presidency of the Central States Numismatic Society and, at 36, the Senior Governor's seat on the American Numismatic Association Board.

His diversified knowledge of numismatics is legendary and has landed many incredible auction consignments, including the fabled Grafton collection of California gold (Numismatist of Wisconsin, 1980); the Milford Saint Lewis Proof collection (Florida United Numismatist, 1983); the Greene County Bank Hoard (Florida United Numismatist, 1985); and the Machado collection of Canadian Proof Notes (Great Eastern Numismatic Association, 1985). Krueger also has the 1982 mid-year and 1984 summer ANA auctions to his credit.

The whole point is that he has "lived numismatics" for more than 30 years as a collector, a parliamentarian, and as a dealer of high regard. His association with Martin Paul as a partner and consultant enhance his already deeply rooted numismatic involvement.

At the age of 30, and after less than a decade as a full-time professional numismatist, Martin Paul has already established himself as one of the most astute, most knowledgeable and most equitable people in the trade.

In the four month period from August to November 1985, his wholesale operation, The Rarities Group, Inc., of Marlboro, Massachusetts recorded sales of $6.1 million—a higher volume than most retail coin dealers handle in a year, especially when one considers that the figure does not include bullion or semi-numismatic material.

Paul is expanding into private customer sales as well. He recently incorporated a new retail company called Numismatic Wholesalers, Ltd. (NWL). Already NWL is recognized as a leader in the rare coin industry for the high quality rare coins and service it provides its clientele.

As the major buyer at most U.S. based auctions, Martin Paul is widely acknowledged as "the one to beat on the auction circuit," often times buying 10% or more of major multi-million dollar offerings. His practical experience blends well with Krueger's established track record of 55 auctions.

The Better Kept Secret

NNCS AND HERE'S WHY!

Have you ever noticed how rare coin dealers are so eager to sell you coins on the one hand, but when it comes time to sell your rare coins back they run the other way?

The fact is that the profits that are so often touted in rare coin investment literature are nothing more than **paper profits.** The only way the investor will realize **in-the-pocket-profits** is to buy coins that are accurately graded with a dealer willing to buy back his coins at a fair market price for the grade.

Well, that is precisely the pledge given to you by authorized National Numismatic Certification Service (NNCS) dealerships. Every coin sold by authorized NNCS dealers must meet the stringent, market-tested standards of NNCS's grading board; the only service which has the world's foremost grader of U.S. investment quality rare coins, Martin Paul. Because of their own confidence in NNCS grading, each and every authorized NNCS dealer is committed to buy back at the grade and at fair market price for that grade every NNCS coin they sell through their individual investment programs.

Compare this with PCGS's guarantees which **do not** require that an authorized PCGS dealer pay either a fair market price for coins they have sold or even make an offer for coins sold. But more importantly, compare the quality and value of other certification services' coins being offered! You will find that NNCS graded coins are consistently and accurately graded!

So—What are you waiting for? Call any of the authorized dealers listed below today for further information.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same charecteristics as the MS-65--but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63 but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

UNC TYPE COINS

Bid prices are for strictly graded coins. Commerical or borderline graded coins may bring substantially less.

MINT STATE GOLD FIRM AT CURRENT LEVELS

Silver Dollars, Commems Mixed, But Trading

The Market in Depth

A recapitulation of the Milwaukee ANA has produced a number of positive signs which many dealers feel will help increase the volume of business over the coming months.

1. First and foremost, we are coming out of the preconceived trap "the summer doldrums". Dealers anticipate, so they expect business to be slow during this period. This is understandable, yet, if this is so true, why do so many dealers continue to do millions of dollars in business throughout the summer? I contend, dealers only do what they want to do or are capable of doing. The dealers at ANA, who worked hard, didn't have time to complain; and the majority made money. Those who complained were usually sitting at their bourse tables waiting. Anyway, summer is nearly over and now is the time for dealers to locate those undervalued coins for their best customers.

2. Although prices for many coins within specific series are markedly lower, every series contains particular dates which are more difficult to locate than others. Moreover, some of the coins which have fallen over the past couple of weeks are not really plentiful, it's just that supply is temporarily larger than demand. In many cases, this is a matter of dealers taking profits on some coins, which they know will not be available in large supply in the weeks to come. Yet, there is a time to sell and take those profits, knowing full well, they will be buying some of the same issues for their customers in the not too distant future, thus creating a more active market.

3. There are numerous dealers out there in the coin world doing their homework on relative rarity of one series versus another and in more depth, coin by coin within a series. Most of these studies will never be published, but if one watches for certain bids, then searches the bourse floors, auctions, and coin shops, even the novice can learn what is meant by relative value. Of course, strict grading is always a prerequisite. And the novice cannot learn how to grade overnight. The novice should buy coins for enjoyment. A non-dealer should only buy precision graded coins for profit when he can grade as well as or better than dealers, or his dealer takes complete care of him through a competitive buy/sell guarantee.

While on the subject of grading: What is the purpose of grading? In the beginning, grading was performed to describe a coin. When two people are looking at the same coin, few words are needed. But, when one, who has seen the coin, wants to explain to another, who has not seen the coin, the merits of such coin, many stunning adjectives may be used to relate the exactness of said coin. As time passed, fewer words were used to describe and numbers were employed as a means of shorthand. Nevertheless, the MS system of grading only supplies generalities as to value. An exact price cannot be established until buyer and seller reach agreement. When they reach agreement on prices, one can pretty well determine that they have also reached agreement on grade. The evaluating of coins is performed in order to give dealers a set of parameters by which to work more functionally in today's money oriented society relative to other needs and desires.

This Week's Market

CENTS: BU Lincoln rolls continue to be less than glamorous as a series. Nonetheless, a few dates are active at current levels or higher. The 1941-S, 49-S, 55-S (now $10), 60-P sm date will find occasional buyers at bid levels; the 1952-D roll is wanted at a higher $5 per for up to 100 rolls.

NICKELS: Activity for BU Jefferson rolls is almost non-existent at this time. To show you how contradictory this series is, one buyer will buy an original bag of 1950-D's at $18,500, but, he will sell a single roll at the pro-rated rate of $185.

DIMES: Several dates within the Mercury dime series are still strong at ask or higher (usually pre 1940's), and the 1938-D and S rolls are now bid at $2200 each. The 1941-45 dates do not seem to be as much in demand, but still trade at the bid levels.

BU Roosevelt dime rolls found only two changes this week: 1948-P is now bid at a higher $300, and 49-P at a lower $625.

QUARTERS: BU Washington quarter rolls have remained very quiet with no changes. Trading seems to be at a standstill except for an occasional roll or two to satisfy a want list.

HALVES: BU Franklin rolls are not seeing any advanced bidding either. The only change is for 1955-P's, down to $285 bid. The Kennedy rolls (1965, 66, 67) also finds discounted sell prices. However, the 1984-P & D rolls continue their price rise.

DOLLARS: The Morgan dollar market seems to have reached a base for MS-64 & 65 specimens. Common MS-64's (large quantities) are in demand at $190 and higher depending on the date. However, a few of the slightly better common dates continue to seek lower levels. Also lower this week are 1922-25 'P' mint Peace dollars.

Although the common MS-65 dollars have fallen again this week,bid prices appear to be firm as several buyers are back "in" at these levels. A few of the slightly better common dates are lower as these dates seem to have suffered from the downward trend.

PROOF SETS and MINT SETS: Most proof sets are steady with the exception of 1950, 54, & 55, which are all minutely lower. Mint sets are fairly quiet, for the most part, although 1975 and 76 sets are higher.

COMMEMORATIVES: There may be a rather large number of minus signs this week for MS-64 & 65 commems, but the unwritten story may be more important. Minus signs are an indication of sellers at lower levels, while bidders are at today's new levels. Those issues with no changes find bids at current levels. This series is still very actively traded.

TYPE: Changes are minimal in the type area, specifically, in PR-64 & 65. Type remains mixed as most buyers keep bids at current levels. When higher bids are found, they are usually followed by limited quantities.

GOLD: U.S. gold may not change in the same ratio as gold bullion, but circ U.S. gold certainly follows bullion when it changes dramatically. This could be seen last week as gold went up some $30 over the previous week as $5, $10, and $20 gold pieces increased in VF thru AU. This week bullion dropped about $15 and virtually the same gold coins have fallen.

Buyers are firm to a little higher for $20 gold as European supplies seem to be a little thin at this time.

FOREIGN GOLD: (Modern & Restrikes. Traded in BU Condition.)
Bullion related gold coins in this issue are figured on a basis of gold at $375.70 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-60 (UNCIRCULATED) Any piece with many bag marks, may show only a minimum of wear. Should have full luster. These are also above average coins.

MS-63 (CHOICE UNCIRCULATED) Will have many bag marks, may show only a minimum of wear. Should have full luster. These are also above average coins.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions to the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

MOST DEALERS FEEL UPTURN IN BUSINESS

U.S. Gold Leading Market From Current Slump

The Market in Depth

Teletype bidding seems to have taken on more of a positive tone over the past week. Buy messages now outnumber sell messages substantially, lending credence to what many dealers believe will be an atmosphere which is more conducive to running a more profitable business in the months to come. Obviously, this will be a major improvement for many dealers over the past few months.

Over the last decade, quality silver dollars have consistently increased in value, sometimes in a very controlled environment, sometimes, at seemingly runaway levels, not unlike hyperinflation in some foreign countries. This, of course, was the case until recently when the marketplace would not accept a common 'S' mint, MS-65 dollar at $1,000! Yes, some sold wholesale at this level, but then, more and more dealers became sellers, thus, taking profits. This caused a downward spiral, that just now seems to have reached support levels at the $450-$475 range.

While many dealers seem to be buying at these levels, the slightly better common dates appear to be backtracking somewhat. This is understandable since these coins seemed to have enjoyed a much higher than anticipated price rise over the past year which widened the spread between them and the most common dates. With support now at $475 for common dates, it would seem the others will find support in the near future.

The MS-64 area of silver dollars had increased substantially over the past 6 months and like MS-65's, they too have fallen off recently. Again, like MS-65's, there appears to be substantial market support at the $200 level for common dates. And showing an even stronger picture are some of the more difficult to locate dollars, such as, 1886-S, 87-S, 88-S, 89-S, 91-P, 92-P, 93-P, 98-S, 99-S, and 1900-S. These dates, quite obviously, cannot be found in quantities in these higher grades. The aforementioned are considered to be somewhat plentiful in MS-63 and lower as they are all "Redfield dates". Yet, very few coins from the Redfield Estate would meet today's stricter grading for MS-64 and MS-65. (MS-64 was not used at the time when the Redfield Estate was being distributed. In fact, at least one company marketed what they described as MS-70's from this estate.) Needless to say, higher bidding for these dates is not bringing many specimens into the marketplace.

Being that quality dollars have led the market over the last several years, and if, in fact, they have truly reached support levels, then, we might expect the rest of the market to solidify and begin to see positive action once again. Commems are showing up on dealers want lists again. Several want to buy back in at today's lower levels, while some dealers will even pay more for specific issues. A few will pay in advance of bids for selected quality coins.

One series which has continued to stay active throughout the recent down market is U.S. gold. Except for a few issues which did decline slightly, this overall series, in MS-64 and 65, is very strong at current levels. In most cases, there are very few coins available which actually meet the strict grading standards of today. When coins are offered, they are immediately snapped up.

With these series being active at today's levels, one can be hopeful that other series will soon follow.

This Week's Market

CENTS: BU Lincoln rolls are not showing any signs of a warming trend. The only noticeable bidding this week, was for the 1960-P sm. date and 1970-S sm. date at current bids, as was the proof 1984-S roll.

NICKELS: BU nickel rolls are extremely quiet, with trading minimal at best. Buyers continue to look for properly graded early Buffalo nickels in MS-63 and better. Pre-1930 Buffs are very difficult to locate in MS-64 and better.

DIMES: Rolls of Mercury dimes are not seeing quite as much bidding activity of late, but when available, will still command bid levels. Quite a few additional buyers have entered the singles market and are looking for MS-63 and better coins.

QUARTERS: BU Washington quarter rolls are being ignored for the time being. That, in itself, may be good news because dealers are not offering rolls at discounted prices. This is having a stabilizing influence at this time.

HALVES: BU Franklin rolls, for the most part, are firm at today's levels. There are very few discounted offers to sell at this time. The only thing this market lacks right now is a few want lists, which would encourage buyers even more.

DOLLARS: Although several minus signs do appear for MS-64 and 65 dollars, the market, as a whole, can be considered much more active at today's levels than it was during ANA. The most common dates have reached a level of support, while the dates with minus signs are not necessarily an indication of weakness, but a sign of adjustments as supplies have temporarily overshadowed demand.

PROOF SETS and MINT SETS: A few scattered minus signs appear for proof sets (1951 and 1960 sm. date), yet, the rest of these issues are firm at current levels. There is a nice balance of buyers and sellers at today's levels; this is also the case for mint sets.

COMMEMORATIVES: The recent onslaught of minuses has slowed down in the commem series. Very few issues are lower in MS-64 and 65 as sellers discount these specific issues. The rest of this series seems stable at today's levels.

TYPE: MS-64 and 65 type remains mixed at this time. Nickel coinage seems to be a little lower, while silver issues are stable. It appears that most bidders are looking for the rarer issues in gem quality.

GOLD: It seems that the more active $20 gold becomes in MS-60, so follows the rest of the gold market. At the ANA, AU and MS-60 Saints and Libs were easy sellers; since then supplies seem to have dried up. Most dealers are trying to keep their buy prices steady, but this results in not purchasing many coins. An added note: At today's bid levels, buyers are being pickier and getting nicer coins than when bids were higher 10-12 months ago.

FOREIGN GOLD: (Modern & Restrikes. Traded in BU Condition.)
Bullion related gold coins in this issue are figured on a basis of gold at $380.00 per ounce.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-60 (EXTREMELY FINE) Will have even overall wear. Will have no bag marks, may show slight weakness of strike. Should have full luster. May be well above average in appearance.

MS-63 (CHOICE UNCIRCULATED) Will be sharply struck, have full luster (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

"Ikes"

The most overlooked series in Numismatics today
The most undervalued series in Numismatics today
The most underrated series in Numismatics today

Books will be shipped the end of September 1986 (tentatively)

Did you know that all the Uncirculated Eisenhower dollars come in Proof-like condition, the catch is they are 100 times rarer than 4 million Morgan dollars in Prooflike condition. Prooflike Ike dollars sell for a mere fraction, or less than 10%, of Morgan P.L. silver dollars.

90% of dealers know nothing about Ike dollars

Eisenhower Dollars are the last series that offer 100% to 400% upside increases in the next 2 to 4 years and more. Nothing in Numismatics today offers a better upside potential!

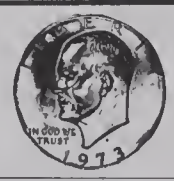
Eisenhower MS-65 silver dollars were sold for $4.00 in 1976 and MS-65 Morgan and Peace silver dollars were selling at the same time for $8.00, only a 2 to 1 ratio. Today MS-65 Morgan and Peace dollars are selling for over $800.00 for just common dates while Ike silver dollars are selling for around $35.00 for common dates. That is a 23 to 1 ratio.

There are over 4.3 million Morgan and Peace dollars in MS-65 grade. There are only 579,000 Eisenhower silver dollars in MS-65

MS-65 Ike silver dollars are 7.8 times rarer than MS-65 Morgan and Peace silver dollars and only sell for less than 4% of a Morgan or Peace dollar

Over 3 years were spent to produce this massive work on Ike dollars. The book breaks down Eisenhower dollars into Strike, Lustre and the amount of Bagmarks per side to ascertain grade.

About The Author



Mr. Hager has sold well over $110 million worth of coins in the last 25 years, and is an author, teacher, lecturer and is considered an expert in his field. Mr. Hager, 37 years old, who wrote the number 1 and number 2 selling silver dollar books in 1985 and 1986, sold over 14,000 books worth $850,000.00, hopes to do it again in 1987 with the Ike book. Mr. Hager started collecting in 1959 by going through 10 to 15 bags of Morgan and Peace dollars per weekend from 1959 to 1964. Mr. Hager has viewed well over 3 million silver dollars as well as over 250,000 Ike dollars from 1980 to present.

Mr Hager has been asked to speak and lecture on grading at over 20 major coin shows per year. He has written, to date, the largest and most comprehensive silver dollar books, over 1550 pages, in the last 3 years. It would cost over $100 million dollars to duplicate what Mr Hager has acquired and written to date.

Pre-publication price is only $35.00 till August 31, 1986

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65 -but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck -and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets in this chart are for "typical" coins. These usually average MS-63 -but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

UNC TYPE COINS

Bid prices are for strictly graded coins. Commerical or borderline graded coins may bring substantially less.

MARKET STILL ACTIVE, BUT AT LOWER LEVELS

MS-65 Dollars Reach Recent Lows

The Market in Depth

Although Walking Liberty half dollar rolls are not attracting much attention lately, there are several buyers for strictly graded MS-64 and MS-65 specimens. In fact, there are even a few buyers for properly graded MS-63's. The reason rolls are not as popular right now is because the "cream" has been removed. Therefore, most rolls now contain MS-60 to MS-63's with very few, if any,64's. With rolls recently bid as much as $2500 each (this breaks down to $125 per coin), and most now being MS-60's (bid at $37.50 each) and MS-63's (bid at $95 each), it becomes unprofitable to break up rolls as singles. This leads us to the fact that many dealers are once again buying Walkers at the new lower levels, but, only for specific quality in singles. At today's lower levels, many dealers have been advising their customers to buy now and take advantage of the short-lived excess of supply.

Even though rolls are somewhat soft, an original roll set, unpicked, will still bring in excess of the total of all the rolls when added together. This case is not unlike the silver dollar roll market, in that, the more rolls are picked, the less demand for rolls at higher levels. Eventually, rolls may only be worth the total sum of their single bids added together.

Now that the Statue of Liberty coins have been in the public's hands for a modest length of time, it may be appropriate to view their overall acceptance. Like many new issues, when they first came on the market, there was the usual amount of demand over the initial supply. This created an expected price rise, yet, as these issues represent added significance, a slight price panic can and did occur as buyers felt they would be left out. But, as supply satisfied demand at the higher levels, some buyers took profits, or in some cases, even losses, if they felt they made a mistake and bought in at too high a price. Both factors could have caused prices to go lower and eventually settle at today's somewhat lower levels.

Though prices have fallen from the highs, there is now a steady demand for Statue of Liberty coins and sets. They have fallen right in with the mainstream and have been accepted as numismatic items. There is prominent collector interest and some issues have small enough mintages that one might even feel comfortable buying them as a long term investment.

Some issues may have traded at higher levels before they were actually listed in the CDN.

This Week's Market

CENTS: The majority of dealers have put BU Lincoln rolls way down on their want lists if they even appear there at all. Lately, there has been an absence of bargain-hunting. Nevertheless, a few dealers will occasionally buy a specific number of rolls to fill certain needs only.

NICKELS: The only change this week in BU Jefferson rolls is for the 1943-P, now bid higher at $125. Otherwise, this series is quite slow. Active bidders can be found for original Buffalo rolls at current levels.

DIMES: If one has followed the BU roll market in Roosevelt dimes of late, a lack of bidder support has been apparent. Yet, levels have reached apparent support as sellers will no longer sell much at discounts. To every rule, there is an exception. Several dealers feel the 1946-S roll is somewhat undervalued, on the other hand, no one has stepped forward to support this date. It continues to be offered under bid, with no ready buyers.

QUARTERS: BU Washington quarter rolls found no changes this past week, but, there seems to be more bidder interest in early singles---1932 thru 1940 ---in MS-63 to MS-65.

HALVES: MS-65 Walking Liberty halves is another area which has recently suffered some price adjustments. Many of the 1941-47 issues have fallen as much as 18%. The upcoming Monthly Summary will reflect these changes. Nevertheless, they are very active, once again, at the new lower levels. Joining in the active support are also MS-63's and 64's at today's levels. Several bidders are now quantity buyers.

Seemingly stable at today's levels, a couple BU Franklin dates did suffer minor corrections this past week. The 1953-S roll is now bid at a lower $390 and the 1955-P has fallen to $275.

DOLLARS: MS-64 and 65 dollars continue to suffer from adjustments. There is absolutely no bidder support at current levels for those coins exhibiting minus signs, while sells are monitored from time to time. The majority of the MS-65's involved are in the $525 to $2000 bid range.

PROOF SETS and MINT SETS: Proof sets are steady as buyers take what sellers have to offer at current levels. The lone exception here is the 1960 sm. date proof set which has fallen to $20 bid. Mint sets are also stable with the 1956 & 57 sets wanted at higher bids, as are the 1973 sets.

COMMEMORATIVES: Silver commems, although showing numerous minus signs in MS-64 & 65, remain one of the most popular series in numismatics. Many dealers are, once again, recommending specific issues after this recent downturn. The recent declines seem to be strictly a matter of profit-taking as prices rose to what many dealers felt were unrealistic levels in too short a time.

TYPE: Generally speaking, type coins are fairly active at today's levels. The dealers who believe in type at these levels buy coins from those who think some areas are overpriced. The sellers just move on to other series, while buyers stock up or sell to their clients.

GOLD: U.S. gold coins seem to represent the most solid area of numismatics today. The many plus signs in VF thru MS-60 grades are an indication of coins consistently trading at levels above bid. The grades MS-64 and 65 will also trade at current bid/ask levels when coins can be located.

FOREIGN GOLD: (Modern & Restrikes. Traded in BU Condition.)
Bullion related gold coins in this issue are figured on a basis of gold at $388.25 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

Prices listed are for no-question graded coins in each category. Borderline or split-grade coins may bring over or under respective bids.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-63 (UNC. DETAIL, NEAR WHITE) Coins must be free of significant surface hairlines and/or abrasions, but may have a few minor ones. Average eye appeal.

MS-64 Will be sharply struck and have full lustre (brilliant or original toning). May exhibit some field distractions, but none major. May have a few minor cheek contact marks. Definitely nicer than an MS-63. Must have eye appeal.

MS-65 (GEM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original toning). Will exhibit no major distracting ones in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-63 PROOFLIKE (WHOLE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-63 but with the additional feature of deep mirror prooflike surfaces both sides.

HERITAGE RARE COIN GALLERIES

A Very Special Offer!

Are you an active collector? If so, our next *Rare Coin Review* issue (No. 62) will delight you. Offered for sale are Morgan dollars, Peace dollars, Washington quarters, double eagles, "type" coins, Proof coins, Liberty Walking half dollars, colonials, Franklin halves, popular sets and collections, nickels from Shield to Jefferson types, Mercury dimes, commemorative silver and gold coins, U.S. currency, and just about everything else you can think of—all from what we consider to be America's finest inventory of carefully, conservatively graded coins!

Hand-picked quality. "No two coins are ever exactly alike in every respect and thus values vary," states the American Numismatic Association in its brochure, "Basic Facts About Grading and Authentication." Further, the A.N.A. states: "In some instances AU–55 graded coins could be valued nearly equal to MS–63 pieces because of superior eye appeal; conversely, some MS–65 coins are valued lower than MS–63 for reasons of poor strike, lustre, or flaws." Bowers and Merena is a leading seller of A.N.A.-graded and P.C.G.S.-graded coins—but not just ANY A.N.A.-graded or P.C.G.S.-graded coins. The expert staff at Bowers and Merena—including Thomas Becker, Q. David Bowers, and Raymond N. Merena—often have to review 5, 10, or even more A.N.A. or P.C.G.S.-graded coins to find a single piece that has the right combination of technical grade, strike, planchet quality, lustre, and aesthetic values. When you buy A.N.A. or P.C.G.S. graded coins from Bowers and Merena, you get the pick of the litter, the cream of the crop! (Of course, if you are more concerned about price than quality, we can supply "bargain" A.N.A. and P.C.G.S. coins, too—but these will not be of hand-picked quality).

Plus: The new *Rare Coin Review* is packed with interesting articles, grading information, investment and collecting news, and other fascinating, informative, and valuable information!

Limited Offer: In addition to those for our regular clientele, we have printed just 1,000 extra copies for this limited offer. Send us $1 to cover postage and handling, and we will send you a copy of our *Rare Coin Review* (regular cover price $5!). But, act quickly, for once the 1,000 copies are gone, that's it!

Or, we invite you to send $39 to subscribe to our next six *Rare Coin Review* issues, the next six auction catalogues issued by Auctions by Bowers and Merena, Inc., and all of the *Special Coin Letter* copies issued in that interval—a value of over $100 if ordered separately! (Note: this subscription rate is for U.S. addresses only).

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65 but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck --and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets in this chart are for typical coins. These usually average MS-63 but may also include some MS-60 and MS-65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark

UNC TYPE COINS

Bid prices are for strictly graded coins. Commercial or borderline graded coins may bring substantially less.

U.S. GOLD STRONG ACROSS THE BOARD

Walking Liberty Halves Regain Lost Momentum

The Market in Depth

A week ago Walking Liberty half dollars looked very weak and generally had little support. Common dates, 1941-P thru 45-P, were on the verge of falling below the $350 level. Now, that has all changed. Bidders are not only supporting this market, they are willing to pay $375 minimum for gem coins. They don't have to be certified either, just properly graded 65's. This support will probably carry over to the other issues as well, and make them considerably stronger.

The strength of gold bullion is beginning to show on the faces of gold coin dealers across the country. Not only does their inventory increase in value, but their level of confidence concerning the business also rises. Since very few U.S. gold dealers are strictly gold oriented, this optimism obviously carries over to other areas of their business. The other areas of activity will depend on the individual dealers personal expertise.

Twenty-dollar gold pieces will undoubtedly lead the gold series when it gets in a warming trend. This time is no different than in the past as many dealers are scrambling for the available supply of Libs and Saints. In VF thru MS-60, twenties carry the smallest premium over gold value and usually represent the issues with the least downside risk. Aside from their size and beauty, this is the main reason for their popularity. And along with dwindling European supplies, these factors could mean an increase in bid levels in the near future. An added point: The majority of dealers are being quite grade conscious. They will accept only properly graded coins at these new higher levels. This is not like last year's runup, wish coins do not make the grade!

Silver commems are again finding recent lows in MS-64 and MS-65. Many dealers feel this series has fallen far enough, but, as of yet, these same dealers have not put their buy prices (at current levels or higher) out there for sellers to take a shot at. For now, it appears that most transactions take place behind bid levels. Still, this is a very popular series as can be seen by the fact that certified coins, ANACS and PCGS, in most issues, are trading at higher levels. This makes it apparent that the majority of dealers place more value on certified coins than non. This takes into account the fact that coins take time to get certified (the market could change while waiting in the system) and the cost of certification. Prices for non-certified coins are undergoing adjustments at this time, primarily for these reasons.

This Week's Market

CENTS: BU Lincoln rolls are still not getting much attention, although a few dates have shown plus signs. The 1954-P is higher at $11.50 bid, along with the 1960 sm. date roll at $71.

NICKELS: Except for a few late-date Jefferson rolls this series remains stagnant. Very little interest is shown by the majority of dealers and even those with a slight interest in earlier rolls are normally buyers at well off of bid.

DIMES: Original rolls of Mercury dimes continue active at today's levels with the 1938-D, and S rolls even higher. Surprisingly, BU Roosevelt rolls are seeing a little action as some dates even show plus signs. The 1956-D, 57-D, and 61-P have all gained a little ground.

QUARTERS: Except for a lonely minus sign for 1946-D (bid-$190), the Washington quarter series is not getting much action at this time. There are very few dates being offered for sale, yet, when they are, dealers usually want at least bid.

HALVES: Typical of the Franklin series of late finds the 1963-P and D rolls declining to $90 bid. However, a few rolls have advanced this week. The 1958-P ($173 bid), 1959-P ($120 bid), and 1960-P ($127 bid) have all gained a little momentum. Also, the 1964-P and D Kennedy rolls are higher at $54 per.

DOLLARS: There is another run of minus signs along the MS-65 dollar chart as buyers for these various dates, at current levels, are nowhere to be found. However, there remains substantial support for common dates at $475 and up.

Along the MS-64 chart conditions are similar, but minus signs are not as plentiful. Support continues for the most common (1881-S) uncertified coins at $190. Certified coins are somewhat higher. (Please check the CCDN for certified coin prices.)

The 1971-S thru 74-S Blue Ikes (BU, 40% silver) are higher again this week as several dealers increase their buy prices. Most of these dealers want large quantities.

PROOF SETS and MINT SETS: Both of these areas appear to be quite stable at this time. When sets are offered at anywhere near bid, they usually sell very quickly. Most marketmakers keep their bids right at today's levels.

COMMEMORATIVES: Several dealers are wondering when this slide will end. MS-64 and 65 commems continue to fall as a series as buyers remain at under bid levels. Occasional below-bid sellers do not help the situation either. As we said last week, several dealers feel this is a temporary situation which will turn around quickly. What it lacks right now is leadership and, of course, higher bids.

TYPE: Proof type is mixed in 64 and 65, while mint state finds several issues lower. Many dealers speak of a stronger type market, yet, their buy prices do not indicate this. The most positive aspect of this area seems to be the touting of better or rare date issues. In most cases premiums are quite low in respect to common issues; several dealers feel this is about to change.

GOLD: As one can see from the gold chart, this series continues as the most active. There is a diverse group of dealers from all parts of the country who need coins for clients. They may be fussy, but the number of plus signs indicates they are serious. With the large numbers of coins changing hands, it is apparent that this series is hot!

FOREIGN GOLD: (Modern & Restrikes. Traded in BU Condition.)
Bullion related gold coins in this issue are figured on a basis of gold at $412.00 per ounce.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark--these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

MS-63 [illegible] MS-64 Will be sharply struck and have full ultra (brilliant or original) luster. May exhibit some field distractions but none major. May have a few minor sheen or contact marks (definitely more than at MS-63) but have eye appeal.

MS-65 (=FBM UNCIRCULATED) Will be sharply struck and have full lustre (brilliant or original tinting). Will exhibit no major distractions in the fields and will exhibit virtually clean appearing face and breast feathers. MS-65's are only a small (but varying) percentage of available uncirculated specimens of any date. Must have eye appeal.

MS-65 PROOFLIKE (CHOICE UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65 but with the additional feature of deep mirror prooflike surfaces both sides.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same characteristics as the MS-65 but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Prices for single BU sets in this chart are for "typical" coins. These usually average MS 63 - but may also include some MS 60 and MS 65 examples. For strictly graded MS-65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

UNC TYPE COINS

Bid prices are for strictly graded coins. Commerical or borderline graded coins may bring substantially less.

STRONG PURSUIT FOR WALKERS AND GOLD

Commems Find Support At Today's Levels

The Market in Depth

Week after week, more and more dealers are being convinced that now may be the best time in quite a few years to start buying better date coins. These are, more often than not, low-mintage coins within almost any series. These are not to be confused with rare dates that already carry a hefty price tag. They are, however, the lower than normal mintage coins within a specific series, which are not encountered everyday, that enjoy but a small premium over the common dates which can be found on a more ready basis. These coins have probably been ignored too long and many dealers are now recommending them to their customers. These coins will give a wider range of grades to choose from. As long as the specific graded coin is accurately graded, one need not stick with only MS-64 or better coins. Properly graded 63's (and in some cases even 60's) can be just as beneficial as the higher grades if priced accordingly.

The following list can be used as a guide for selecting coins, which have a lower than normal mintage and may be found at a minimum premium over common dates.

Series	Better dates are generally considered to be mintages below these figures.
Two Cent	1,500,000
Three Cent Nickel	900,000
Three Cent Silver	750,000
Shield Nickel	600,000
Liberty Nickel	5,500,000
Liberty Seated Half Dimes	860,000
Liberty Seated Dimes	430,000
Barber Dimes	2,100,000
Twenty Cent Pieces	40,000
Liberty Seated Quarters	400,000
Barber Quarters	1,050,000
Liberty Seated Halves	230,000
Barber Halves	1,150,000
Liberty Seated Dollars	78,500
Trade Dollars	97,000

There are a few exceptions in almost every series. This is only a guideline. Not all of the coins with mintages under these figures can be purchased at small premiums. Some dates are rare and will command their own price level.

This past week, Auctions by Bowers and Merena, Inc., conducted an auction in New York City. The total sale realized nearly $1.6 million. Collectors seemed to be heavily involved, as were many dealers. Floor bidders were a significant part of the sale, although, a tremendous number of mail bids were received. The following are a few selected lots from this sale.

Denomination	Catalogue Grade	Price Realized
1793 Wreath Cent	VF-30	$ 4,180
1878 Shield Nickel	PR-63	$ 1,045
1918/17-D Buffalo Nickel	MS-60	$13,200
1877 Liberty Seated Quarter	PR-64	$ 3,080
1818 Bust Half	MS-63	$ 3,740
1879-S Morgan Dollar	MS-65	$ 550
1892-O Morgan Dollar	MS-63	$ 440
1903-S Morgan Dollar	MS-63	$ 3,300
1891-CC $5 Gold	AU-55	$ 578

This Week's Market

CENTS: Several dates within the Lincoln series are higher this week as the result of active pursuit by some dealers. Those wanted at higher levels include 1941-D, 44-S, 48-D, 49-S, 53-S, and 56-D. Obviously, at higher buys, dealers will not accept spotted rolls.

NICKELS: Although generally ignored, the Jefferson series does have a few bright spots. The 1950-D is wanted in quantity at $185 bid. Two of the war nickel issues are higher: 1943-P ($135) and 1944-P ($160).

DIMES: This week finds the Mercury and Roosevelt series relatively unchanged. There is significantly more interest in Mercuries at current levels than in Roosevelt dimes. But, if silver continues to climb, confidence will build and it may carry over to BU rolls, such as, the Roosevelt, Washington, and Franklin series.

QUARTERS: The Washington series remains sluggish with no changes, but, the lack of minus signs could be a positive sign.

HALVES: Although a few minus signs appear for Walkers, this series seems to be very active once again. Single coins, after some weakness, are again on want lists for MS-63 thru MS-65 grades.

The Franklin series is seeing more activity of late, yet, prices are mixed. Nevertheless, most dealers consider an equal amount of plus and minus signs, in a series, quite healthy.

DOLLARS: There are still a significant number of minus signs jotting the MS-64 and 65 columns. Sellers seem to have a difficult time finding buyers, thus, prices continue to fall. Activity and support remains strong, however, for the most common dates. And there are a few plus signs for better date MS-64's and MS-65's.

PROOF SETS and MINT SETS: Activity continues strong at today's levels for both proof and mint sets. Especially active are the 1961-63 proof sets at a higher $15 bid.

COMMEMORATIVES: Prices for MS-64 and 65 commems seem to have stabilized this past week. A number of dealers feel more comfortable about recommending most issues to their clients at today's levels. The following prices realized were from the Bowers and Merena Auction: Calif. Jubilee, MS-64 $770. Missouri 2x4, MS-64 $2090. Pilgrim-1921, MS-63 $330. Roanoke, MS-64 $715. 1903 La. Purch/Jeff MS-65 $3,520. 1922 Grant w/star MS-63 $2,310.

TYPE: Type remains mixed in both mint state and proof. In 63 thru 65 changes can be found at higher and lower levels. These changes run strictly according to dealer needs and inventories.

GOLD: U.S. gold remains strong and is a major part of today's numismatic business. Many dealers are feeling more confident as this market continues strong.

FOREIGN GOLD: (Modern & Restrikes. Traded in BU Condition.)
Bullion related gold coins in this issue are figured on a basis of gold at $417.50 per ounce.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the Monthly Summary.

Written by THE Authority.

Jim Halperin is considered to be among the world's foremost experts on U.S. coins and coin grading. Now, with the *N.C.I. Grading Guide*, Mr. Halperin has published a real masterwork – a book that has received unqualified rave reviews from coin dealers, investors, and collectors across the country.

A Revolutionary System.

Using a groundbreaking system of color "coin maps," Mr. Halperin gives common-sense grading facts for EVERY MAJOR U.S. COIN TYPE, in a specially prepared photo section. Overlaying each photo in different colors for different areas on both the obverse and reverse, the "coin maps" are a unique visual guide – showing how great of an impact bagmarks and other imperfections have on every part of a coin. What's more, you'll see precisely where to look for these imperfections. Another special color section shows the highpoints where wear first occurs on every major U.S. coin type. It's an exciting FIRST for numismatics that makes learning how to grade easier for you!

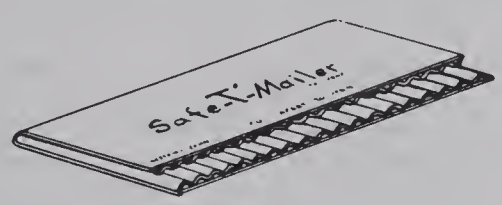
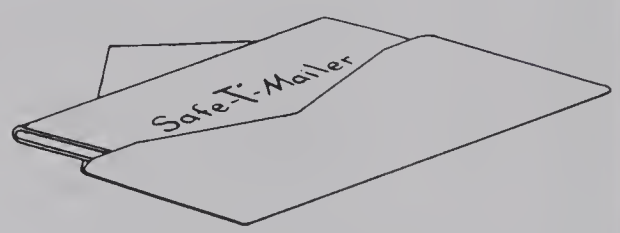
P.O. Box 192 Westport CT 06881 (203)226-4279

THE MAILER OF 1001 USES!



Originally designed by a leading numismatic dealer for mailing coins, medals, paper money,and other numismatic material, Safe-T- Mailer is the perfect means to simplify mailing small objects. It's ideal for mailing refunds...parts...dental instruments...you name it.

SIMPLE TO USE!



Safe-T- Mailer consists of a single sheet of corrugated board coated overall with an adhesive that sticks only to itself. It will not stick to paper, plastic or metal. Objects to be mailed are placed on the sheet, the sheet is folded along the score line and pressed together. It is then ready to be inserted in a standard size envelope,and mailed. No staples or other fastenings are needed. Objects may be loose or in a plastic, paper or metal holder.

1. Place material on sheet as flat as possible, leaving at least $\frac{1}{8}$inch on each side for sealing.

2. Press firmly all over - particularly at the three open edges.

3. Place in envelope and seal.

MS-65 PROOFLIKE (GEM UNCIRCULATED PROOFLIKE) Will exhibit the same chereteristics as the MS-65 but with the additional feature of deep mirror prooflike surfaces both sides

MS-67 & MS-67 PROOFLIKE (SUPERB) Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date

Prices for single BU sets in this chart are for "typical" coins. These usually average MS 63 but may also include some MS 60 and MS 65 examples. For strictly graded MS 65 single sets, use prices for individual issues as listed in the Monthly Summary. Prices for BU roll sets in this chart are for typical original rolls of each date and mint mark.

UNC TYPE COINS

Bid prices are for strictly graded coins. Commerical or borderline graded coins may bring substantially less.

MS-64 DOLLARS UP ACROSS THE BOARD
Dealers Anticipate Strong Bullion Market For Long Beach

The Market in Depth

Most buyers of type coins are currently concentrating on very specific needs. They seem to be looking for PR-64 and 65 coins of obvious low-mintage. Dealers are meeting with mixed success in their pursuits because it is quite difficult to even locate properly graded specimens in these high grades. The net result is that bid prices may rise with very few coins actually changing hands. Copper-nickel Indian cents, after being totally ignored for over two years, are bid at $2000 in PR-65. Type II three-cent silver coins, which have always been tough because of the thinness of the coin itself, are wanted in PR-64 and 65. Half dimes and dimes with stars, in PR-64 and 65, are in strong demand. Other issues in short supply (PR-64 & 65) are Twenty-cents, Liberty Seated dollars, and Trade dollars.

Ike dollars have been enjoying a nice little run of late. The "Blues" (1971-S thru 1974-S, BU 40% silver) have been in strong demand for a number of weeks with active buyers trying to outbid each other up to today's levels. And the last couple of weeks have seen the "Browns" (1971-S thru 74-S, Proof 40% silver) catch fire with bids on the increase. This is not a limited market as any number of dealers will buy Ikes at the new higher levels. Most of the buyers are looking for 200-500 pieces of all dates except the 1973-S proof. It seems like everytime this series becomes totally unsaleable, it may take a few months, but it bounces back and becomes extremely active. In fact, when it does get hot, those dealers who cried that they couldn't sell them, will change their attitude and refuse to sell at the higher bids. Quite a contradiction in market cycles.

At the upcoming Long Beach Convention, one series that is always popular and in demand will be MS-65 prooflike dollars. With the recent downturn in prices of common MS-65 dollars, it is encouraging that prices have held steady for prooflikes. Of course, this is understandable since prooflikes, especially in strict MS-65, are few and far between. There are numerous buyers at current levels with some dealers almost always ready to pay whatever is necessary to buy any deals, small or large, which may come available. Of course, buyers are fussy, but when one pays above bid prices for specific coins, they are entitled to get their money's worth.

This Week's Market

CENTS: Action in BU Lincoln rolls is once again subdued as active bidders are inconspicuous at present. The most consistent activity centers around the 1960 sm. date and 1970-S sm. date rolls, both wanted in quantities, at bid.
